Staying Safe on the Road in the Winter.
By: Steve Hanekamp

With the Winter season here it is important to remember, if you find yourself driving in snowy or icy conditions to make sure you stay alert, slow down, and stay in control of your vehicle.

Here are some safe driving tips for driving on the snowy and icy Wisconsin roads this season.

+ Regularly Check and maintain your vehicles battery, tires and fluids.
+ Plan ahead and account for extra time to arrive to your destination.
+ Always take the time to clear snow from your windshield, lights and mirrors.
+ Dress for the weather.

Also, consider creating a winter safety kit to keep in your car. Some ideas of what could be helpful are jumper cables, bottle of water, salt, blanket, granola bars and a first aid kit.

With the cold months here please remember that UWWPS is here to help. We keep jump packs for vehicle jump starts in our vehicles, as well as a bucket of salt/sand mixture and shovels to assist any motorists in need.

If you need us, give us a call at (262)472-4660.

Remember to take the time to fully clear your windshield for your safety and the safety of others in the roadway.

Our Appreciation
By: Lt. Faye Schouten

UWW Police Services’ mission is to provide proactive, professional and personable services to our community, through planning, education and enforcement. We are very fortunate to have great community partners who support our mission and help us with the services. This month we would like to thank George Clokey, who is a lecturer in the Biological Sciences, for his collaboration and generous donations over the years. We feel “warm and energized” after George’s donations.
