

Principles of Macroeconomics (Econ 202)
Business Statistics I (Econ 245)
Suggestions for Improving Assessment Results
Summer 2006

Principles of Macroeconomics Goals: Students will be globally aware. Students should be analytical.

Business Statistics I Goal: Students will be analytical.

Faculty teaching both of these courses will:

- Encourage students to complete more analytical practice exercises.
- Emphasize more application of ideas and theories, e.g., provide more real world examples and give students applied computer assignments to bridge the gap between theory and business practice.
- Spend more time discussing and interpreting analytical results.

For Macroeconomics specifically, faculty will:

- Move the international component of the course earlier in the semester (it had been at the end of the course) to expand time allotted to global issues.
