COLLEGE OF BUSINESS & ECONOMICS OFFERINGS

MANAGEMENT COURSES (250)

Field trips may be required for any of the courses. Students should check with the Associate Dean, College of Business and Economics, to find out when courses will be offered and the current prerequisites.

250-696   Special Studies -- 1-3 cr
A limit of three credits can be applied toward a major or six credits toward degree. Prereq: Consent of instructor.

250-705   Information System Foundations -- 3 cr
An introductory course intended to provide a basic knowledge of information systems and computers. Includes the study of information system concepts, the use of information systems for management decision-making, the impact of information systems on management, user application development, hands-on experience, elementary programming, and productivity packages.

250-719   Operations Management -- 3 cr
A survey course focusing on the performance of managerial activities entailed in selecting, designing, operating, controlling, and updating productive systems. This life cycle approach will include treatment of non-manufacturing activities, and will draw heavily upon latest developments in the field. Prereq: 260-702, 230-703, and 250-705.

250-721   Managerial And Organizational Behavior -- 3 cr
The course explores the behavior of people in organizations as individuals, and as group members in an organizational context. An analysis of human problems in organizations and the application of results of behavioral science research to organizational problems are included.

250-734   Introduction To Computer Based Information Systems -- 3 cr
A course applicable to all MBA students that examines the role and nature of Computer Based Information Systems (CBIS) in organizations and investigates the effects of these systems on managerial decision making. Emphasis is placed on the analysis of business environment, planning/organizing/controlling CBIS effort, and designing/implementing
in a fourth generation language.
Prereq: 250-705 or its equivalent or consent of instructor.

250-738 Management of Technology -- 3 cr
This is a graduate course designed to acquaint the student with the foundations and the processes of research, development, technology, and innovation. This course draws upon current literatures in the management of engineering and technology-based organizations. Students are exposed to the workings of technology within the company, from its generation in the research and development function, to its commercialization as new products and services.

250-742 Decision Support Systems -- 3 cr
A study of computer information systems which assist managers in their problem solving and decision making responsibilities. Emphasis is on the specification and design of such systems including user interfaces, modeling, and data analysis and design. Students will learn to use a DSS/fourth generation modeling language. Applicable to all MBA students. Prereq: 250-734 or its equivalent.

250-743 Data Base Management -- 3 cr
An introduction to data design and the management of data as a corporate resource. An in-depth study of the relational database model with emphasis on loading, modifying and querying the database using a host language like SQL. Prereq: 250-734.

250-744 Managing Health Services Organizations -- 3 cr
This course examines the tasks, functions, activities and practical skills employed by managers in Health Services Organizations. In the context of a dynamic health care environment, managerial roles, practices, concepts, and techniques such as organizational design, decision making and ethical considerations that transcend levels of organizational hierarchy will be emphasized. Prereq: Graduate standing or consent of the instructor.

250-745 Management and Organization Theory -- 3 cr
The course surveys concepts and research in the analysis of an organization. It examines the history of organization theory, as well as environmental and technological influences on organizational effectiveness. Contemporary developments in management and organization theory are also reviewed.

250-751 Seminar in Human Resource Management -- 3 cr
An examination of the organization and administration of the personnel function in management. It is concerned with the employment, training, safety and health, employees services, and employee relations functions of personnel administration. Attention is focused on a limited number of topics drawn from these areas so more crucial concepts and methods involved may be dealt with in-depth.
250-752 Current Issues in Compensation and Benefits -- 3 cr
An examination of compensation programs in profit/nonprofit organizations. It is concerned with a detailed study of job structures, job evaluation, performance appraisal, wage surveys, basic systems/plans of compensation, and fringe benefits. Attention is focused on a limited number of topics from these areas so more crucial concepts/methods may be dealt with in-depth.
Prereq: 250-751.

250-753 Training and Development -- 3 cr
The course will emphasize the theories of Management Training and Development, and the practical application of these theories in today's organizations. Special emphasis will be on current topics in the field of Human Resource Development, including: Training self-directed work teams, managing a diverse work force, and the practical application of designing programs in today's environment. This will include actually designing a needs analysis and training evaluation programs. The course will frame the concept of training and development within the applicable theory of adult learning.

250-754 Expert Systems In Business -- 3 cr
An introduction to the application of expert systems to the solution of business problems. The student learns to select business problems which can be solved through the use of expert systems. The student learns to structure expert systems to solve appropriate business problems.
Prereq: 250-742 and 250-743.

250-758 Management and Labor Relations -- 3 cr
Primary concern is with contract negotiation and administration. Emphasis is on understanding the forces affecting the decisions of the parties to a labor contract. A dynamic approach is taken to examine difficulties that arise in attempting to administer a collectively established relationship. Study of conflict resolution including mediation and arbitration.

250-759 Business And Society -- 3 cr
The course analyzes (1) a broad spectrum of social, political, ethical, and legal frameworks within which organizations must function, and (2) social trends and their underlying causes as they can affect businesses.
Prereq: 250-745 or 240-721.

250-760 Strategic Management of Human Resources -- 3 cr
This course examines strategic human resources (HR) management and HR planning. Applicable theories and methods of strategic, operational, and tactical planning and their relationship to HR management are covered, as well as the multiple roles HR plays in assisting organizations to gain and sustain competitive advantages in a fast-paced environment.

250-761 Operations Planning And Systems -- 3 cr
A case-study course focusing on major strategic operating decisions faced by production
vice-presidents and their staffs. These decisions include production capacity, type of production system, vertical integration and timing of change. The requirement for operational performance which originates in the corporate planning process and the task of profit planning in various industries is considered via case studies of real world business situations. A research paper and presentation covering in-depth an industry of interest to the student are required. Text and cases are used.

Prereq: 250-719.

250-762 Integrated Resource Management -- 3 cr
A quantitative course providing a thorough treatment of the many common and most useful inventory systems and their impact on materials management. Systems covered will include purchase/production order quantity systems, fixed order size and interval systems under risk and uncertainty, and single and multiproduct stochastic models.
Prereq: 250-719.

250-763 Global Operations Management -- 3 cr
The objective of this course is to enhance the student's ability to conceptualize and manage global operations effectively. A wide range of topics, concepts, theories and tools related to the operations of both manufacturing and service firms are explored from an international perspective. In addition, the comparative position of U.S. production systems is evaluated with those of Japan, Europe, Latin America, and South East Asia. The focus is on covering those aspects of operations management that can help firms become more competitive globally. The aim of the course is to provide the managers with an understanding of the production of goods and services in an international environment through a review and critique of current literature.
Prereq: 250-719 (can be taken concurrently).

250-768 Manufacturing Policy -- 3 cr
A course focusing on the strategic implications of major manufacturing decisions facing the top manager, such as the Manufacturing Vice-President. Different industries are explored relative to their evolving technologies, critical processes, cost structures, and competitive conditions, including global competition.
Prereq: 250-719

250-769 Quality Issues In Operations -- 3 cr
A course focusing on qualitative and quantitative techniques used to study and improve quality of operations in manufacturing and service organizations. It covers topics such as quality philosophy, statistical process control (SPC), acceptance sampling, tools for quality improvement, product and process design. The role of quality in the entire cycle including product/service design, development, production, delivery and customer support is emphasized. An individual research paper and presentation covering the topic of interest will be used.
Prereq: 250-719.

250-770 Organization Design -- 3 cr
Application of organization theory to the structuring of organizations. The course
examines organizational configurations and their effectiveness in different situational contexts to provide a rationale for management practice. 
Prereq: 250-745 or equivalent.

250-771 Strategic Management & Planning -- 3 cr
The course surveys the theoretical backgrounds of strategic management. It also covers practical methods and applications of strategic management models based upon existing theory, research, and practice. Comparative analysis of emerging strategic management frameworks are examined with implications for management practice. 
Prereq: 250-745 or equivalent.

250-777 International Management -- 3 cr
The course deals with concepts, issues, problems, and research in international management, with a focus on the international application of: (1) strategic management, (2) organizational theory and design, (3) organizational behavior, culture, conflict, leadership and communication, (4) ethical issues, and (5) development, control and coordination of international subsidiaries. 
Prereq: 250-745 or equivalent.

250-784 Simulation For Managerial Decision Making -- 3 cr
A quantitative course designed to familiarize the students with the use of computer simulation. Emphasis throughout is on the use of simulation as an aid to managerial decision making. Students are taught to focus simulation studies on tractable questions, to draw conclusions from simulation results, and to bring these conclusions into the managerial context. Examples of applications in manufacturing and service industries are studied throughout the semester. Students write short simulation programs using a specialized discrete event simulation computer language, and analyze simulation generated data using statistical software. 
Prereq: 230-703 or equivalent, and 250-211 or 250-705 or equivalent.

250-788 Business Policy -- 3 cr
The course analyzes organizational environments from the perspective of top management in their efforts to manage a firm's mission, goals and corporate strategy. Case analyses are used extensively to provide students with an opportunity to apply course content to real businesses. Corporate social responsibility and business ethics are also covered. 
Prereq: Last semester of program.

250-789 Readings And Research In Management -- 3 cr
Study of a selected area in management through readings and/or empirical research. 
Prereq: Permission of instructor and department chairperson.

250-790 Workshop -- 1-6 cr

250-794 Seminar -- 1-3 cr
250-798  Individual Studies -- 1-3 cr
Student and adviser decide the study, with the consent of the professor in charge of the study and the approval of the College Graduate Studies Committee. Consult the Associate Dean's Office for further information/limitations.

250-799  Thesis Research -- 1-6 cr
Students must complete a Thesis Proposal Form in the Graduate Studies Office before registering for this course. Requires advance approval of the MBA Program Director.
