1. Plug one end of an Ethernet cable into your computer and plug the other end into the wall jack provided.

   Note: Your Ethernet jack will be orange. The beige jack is your telephone hookup.
   Note: If you do not have a cable, one may be obtained at the University Bookstore or at local retailers.

2. Turn on your computer and open your internet browser.

   Note: Popular browsers include Internet Explorer, Mozilla Firefox, Opera, Netscape, Safari, and others.
Your browser will automatically open to a registration page. If not, attempt to go to http://resnet.reslife.uww.edu.

ResNet Registration Info

Please enter your UWW Net-ID and password.

If you do not know your UWW Net-ID and password go to the help page.

UWW Net-ID: ____________________________@uww.edu
Password: ______________________________

Enter your UW-W Net-ID & password and click accept after reviewing the Acceptable Network Usage Policy.

By clicking "Accept" you signify that you have read and will abide by the terms of the acceptable network usage policy.

Reboot your computer. You are now registered with ResNET.

Additional Notes.

Port Security: If you want to plug your computer into a different Ethernet jack, or want to plug a different computer or console into your Ethernet jack, you must wait 1-2 minutes after you remove your cable and plug another in. Changing the jack you are plugged into or the unit plugged into a jack very quickly emulates a type of network attack that can occur and will trigger the port security feature of our switches which will disable your jack. If this occurs simply call ResNET and our staff will gladly assist you by re-enabling your port.

Virus Scanners: ResNET provides McAfee Enterprise (PC & Mac) free for all students residing in the residence halls. It is not required that you install this software, but an up-to-date virus scanner should be installed on all computers. Bundled with the software is McAfee’s Anti-Spyware plug-in, further enhancing the protection provided. This software can be downloaded at http://my.resnet.uww.edu/. Make sure that you only have one virus scanner installed at a time. Having multiple scanners does not increase protection; it will, however, often make your computer unstable or even unusable.
Additional Notes Continued.

**UW-W NetID Issues:** Administration of the NetID system is handled by the Campus HelpDesk. They can be reached at 262.472.4357(HELP) or just x4357(HELP) using an on-campus phone. They also offer “Password Change Self Service” at [http://password.uww.edu](http://password.uww.edu). Use this page if you have forgotten your password.

If this is your first time on this page:

Please change your password then answer your challenge questions - when you return to the change password screen, click “Logout” in the purple area at the top of the screen. Please do NOT attempt to reset your password again at that time. If you do not know your Net-ID click the "What is my Net-ID" link. Your initial password is your 7-digit ID number.

Attention Mac Users:

When changing your password or setting your challenge questions you must use FireFox and not Safari.
