Synopsis

The Ernest F. Hollings Undergraduate Scholarship Program provides successful undergraduate applicants with awards that include academic assistance for full-time study during the 9-month academic year; a 10-week, full-time internship position during the summer at a NOAA facility; and, if reappointed, academic assistance for full-time study during a second 9-month academic year.

Synopsis

The Undergraduate Research Program (URP) at Cold Spring Harbor Laboratory (CSHL) provides an opportunity for undergraduate scientists from around the world to conduct first-rate research. Students learn the scientific process, technical methods and theoretical principles, and communicate their discoveries to other scientists. Approximately 20 students come to CSHL each summer for the 10-week program, living and working in the exciting Laboratory environment. The 2018 URP Program will be held June 11 to August 11, 2018.

**08925**   **SERC Internship Program in Environmental Studies**   **Smithsonian Institution**   **15-Nov-2017**   **8,800.00 USD**

Contact Name      Dan Gustafson

Contact Telephone      608-265-0850

Contact Email      [ibs@biology.wisc.edu](mailto:ibs@biology.wisc.edu)

Sponsor Website      <http://biology.wisc.edu/>

Program URL      <http://biology.wisc.edu/IBS-SRP.htm>

Deadline Dates (ALL)      15-Feb-2018

Synopsis      SIGNALS is designed to be accessible to rising juniors and seniors who might not otherwise have this kind of undergraduate opportunity. There is no cost for program participation. In addition, a stipend is provided to each student, and housing and travel costs are covered. Underrepresented minority, low-income, and first-generation college students are strongly encouraged to apply, as are students from smaller institutions without broad research facilities. Program participants live close to campus and perform full-time research for 10 weeks within a discipline-based research group led by a faculty member. A seminar series taken alongside allows participants to learn from each other's experiences and contextualize their research projects within the overarching theme of biological information flow, storage, and exchange. Additional events and activities build community, support career and graduate school exploration, and help students build useful skills, such as science writing. Students present their projects at a final symposium and write research reports to summarize their findings.

06579 REU - Nanotechnology for Biology and Engineering Johns Hopkins University 01-Feb-2018 5,250.00 USD

Deadline Dates (ALL) 04-Jan-2018

Synopsis The SFI Research Experiences for Undergraduates (REU) program is a 10-week residential research opportunity in which students develop innovative research projects in collaboration with an SFI mentor. The program asks students to discard traditional disciplinary boundaries, and combine concepts and tools from the physical, natural, and social sciences. This allows students to ask big questions about real-world complex systems using the rigorous methods employed at the Santa Fe Institute.

Deadline Dates (ALL) 05-Feb-2018

Synopsis

The Department of Molecular Genetics and Cell Biology at the University of Chicago is at the forefront of research in molecular mechanisms underlying cell biology and organismal development. Current faculty work on fundamental problems in biology using a wide range of model systems including viruses, bacteria, protozoa, fungi, plants, nematode worms, fruit flies, fish and mice. With funding from the National Science Foundation, the Department offers an exciting opportunity for talented undergraduates to acquire experience in research. This program is designed for students who are interested in attending graduate school and pursuing a career in science. MGCB Summer Internships allow students to devote themselves to research projects, working in collaboration with graduate students or postdoctoral fellows, to address important problems in biology.

Deadline Dates (ALL) 09-Feb-2018

Synopsis

The Danforth Plant Science Center's REU summer Internship program is held eleven weeks each summer and exposes students to a rich research environment. The program gives students experience with all aspects of modern scientific research, from design to experimentation to reporting. Faculty mentors and staff provide insight into the personal qualities that make a good researcher, the process and training involved in becoming a scientist, and the broader impact of scientific discovery.

Deadline Dates (ALL) Different Deadlines, earliest 05-Jan-2018

Synopsis Argonne National Laboratory is seeking highly motivated and energetic undergraduate students for the 2018 summer internship and part-time work experience programs!

Over the years, Argonne has supported thousands of students in their explorations of STEM research careers; provided access to cutting-edge research facilities and fostered relationships with world-class scientists all within 30 miles of the third largest city in the country. We are looking to grow our summer 2018 cohort of students.

REU Program University of Illinois Urbana-Champaign 16-Feb-2018 \$5,000 USD

Deadline Dates (ALL)	16-Feb-2018

Synopsis

Undergraduates planning to obtain Bachelor of Science or Bachelor of Arts degrees in chemistry or related fields between January 1, 2019 and August 31, 2020 are encouraged to apply to participate in summer research in the Department of Chemistry. Opportunities are available in all areas of chemistry: analytical, chemical biology, inorganic, materials, organic, physical, and theoretical. Applications completed (including letters of recommendation) by the deadline, **Feb. 16, 2018**, will be given full consideration. We particularly encourage students who do not have prior research experience or who are members of groups under-represented in the chemical sciences to apply. [Flyer](#)
