This register shows the present occupation and residence of the graduates of the School and their entire experience as teachers or superintendents, so far as known. As these statistics of experience have been compiled recently and are here published for the second time only, they are as yet incomplete; but it is hoped that the record as given will prove of some service. The figures in the left hand column give the number of years of experience before receiving diploma or certificate, those in the right hand column, the number of years of experience since that date to July, 1886; and a dash signifies that the person is known to have done *some* teaching. The difficulty of making up this register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.

GRADUATES' REGISTER.

This register shows the present occupation and residence of the graduates of the School and their entire experience as teachers or superintendents, so far as known. The figures in the left hand column give the number of years of experience before receiving diploma or certificate, those in the right hand column, the number of years of experience since that date to July, 1887; and a dash signifies that the person is known to have done *some* teaching. The difficulty of making up this register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.

GRADUATES' REGISTER.

This register shows the present occupation and residence of the graduates of the School, and their entire experience as teachers or superintendents, so far as known. The figures in the left hand column give the number of years of experience before receiving diploma or certificate, those in the right hand column, the number of years of experience since that date to July, 1888; and a dash signifies that the person is known to have done *some* teaching. The difficulty of making up this register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.

GRADUATES' REGISTER.

This register shows the present occupation and residence of the graduates of the School, and their entire experience as teachers or superintendents, so far as known. The figures in the left hand column give the number of years experience before receiving diploma or certificate, those in the right hand column, the number of years of experience since that date to July, 1889, and a dash signifies that the person is known to have done some teaching. The difficulty of making up the register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.

GRADUATES' REGISTER.

This register shows the present occupation and residence of the graduates of the School, and their entire experience as teachers or superintendents, so far as known. The figures in the left hand column give the number of years experience before receiving diploma or certificate, those in the right hand column, the number of years experience since that date to July, 1890, and a dash signifies that the person is known to have done *some* teaching. The difficulty of making up the register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.

GRADUATES' REGISTER.

This register shows the present occupation and residence of the graduates of the School, and their entire experience as teachers or superintendents, so far as known. The figures in the left hand column give the number of years experience before receiving diploma or certificate; those in the right hand column, the number of years experience since that date to July, 1891, and a dash signifies that the person is known to have done *some* teaching. The difficulty of making up the register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.

GRADUATES' REGISTER.

This register shows the present occupation and residence of the graduates of the school, and their entire experience as teachers, or superintendents, so far as known. The figures in the left-hand column give the number of years experience before receiving diploma or certificate; those in the right-hand column, the number of years experience since that date to July, 1893; and a dash signifies that the person is known to have done *some* teaching. The difficulty of making up this register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.

GRADUATES' REGISTER.

This register shows the present occupation and residence of the graduates of the school, and their entire experience as teachers, or superintendents, so far as known. The figures in the left-hand column give the number of years experience before receiving the diploma or certificate; those in the right-hand column, the number of years' experience since that date to July, 1894; and a dash signifies that a person is known to have done *some* teaching. The difficulty of making up this register increases from year to year; graduates are therefore urgently requested to send a postal card during the year to the President of the School, giving the necessary information, especially in case of change of address.
