

MINUTES
Criterion Three: Core Component 3d Sub Committee Meeting
November 2, 2004 (3.30 pm)
Library Building

Present: Elena Pokot, Lorna Wong, Choton Basu, and Gary Harms

The subcommittee met with the representatives of T&IR. Elena Pokot and Lorna Wong were very helpful and provided several interesting insights on the effort.

T&IR do maintain information on usage of labs, printers, and other resources made available to the students. They also solicit feedback from faculty and students. This input could provide useful information for assessment at UWW.

There was agreement that it would be quite difficult to measure the learning or knowledge component. It was proposed by the sub-committee that it might be prudent to split the learning component into specific sub-parts such as communication, ease of coordination and so on. This was received well by the T&IR representatives.

It was decided that the sub-committee would gather the budget information on T&IR and follow-up with more questions. A short survey will also be designed to gather some feedback.

The group will meet again once the sub-committee has gathered further information.
