

SUCCESSFUL COURSE DESIGN: ONLINE OR HYBRID

Monday, January 12, 2009
Tuesday, January 13, 2009
McGraw 127, 8:30 a.m. – 4:00 p.m.

What are the considerations when deciding whether and how to develop an online or hybrid course? How are these course formats structured differently? How is teaching transformed? What are the strengths and challenges of online and hybrid courses?

Answers to these questions and more will be discussed while learning how to develop successful online or hybrid (also known as blended) courses.

JANUARY 12: Best practices and lessons learned for designing and teaching online or hybrid courses will be shared by UW-Milwaukee and UW-Whitewater instructors. Interactive sessions will provide opportunities to share concerns and gain specific strategies for planning online or hybrid courses.

JANUARY 13: The course design planning process for both online or hybrid courses will continue using the Quality Matters Rubric as an instructional design tool. Participants will learn strategies and participate in hands-on activities to learn how to use D2L and other technology to organize online course content; build learner engagement and community; and align course goals, activities, and assessments.

Participants are encouraged but not required to attend both days. Continental breakfast, lunch, and afternoon refreshments will be provided for both days.

WORKSHOP FACILITATORS:

- TOM GILLESPIE AND KAREN SKIBBA FROM THE UW-W LEARNING TECHNOLOGY CENTER
 - SPEAKERS ON JANUARY 12 WILL INCLUDE EXPERT HYBRID AND ONLINE INSTRUCTORS FROM UW-MILWAUKEE AND UW-WHITewater.
-

REGISTER BY DECEMBER 12. SEATING IS LIMITED TO 20 PARTICIPANTS.

To register online, go to: <http://signup.uww.edu> <<http://signup.uww.edu>>

If you have any questions, please contact Karen Skibba at skibbak@uww.edu <<mailto:skibbak@uww.edu>>.
