MANUFACTURED BY: RBP CHEMICAL CORP
TEL 414-258-0911 150 S. 118 STREET
800-558-0747 MILWAUKEE, WI 53214

HAZARDOUS INGREDIENTS
NAME: Magnesium Nitrate
CAS#: 10213-15-7

This product does not contain chemicals requiring reporting under SARA TITLE III Section 313 at above the De Minimis level.

PHYSICAL/CHEMICAL CHARACTERISTICS
Boiling Point: nd
Solubility in Water: Complete
VOC by EPA METHOD 24 0.45 lb/gal, 54 gm/l, 1.5%
Density: 1.12 g/ml, 9.3 lb/gal
pH: 2.8
Appearance and Odor: Lightly cloudy, aquamarine liquid with mild odor.

FIRE AND EXPLOSION HAZARD DATA
Flash Point: None
Extinguishing Media: Appropriate to major cause of fire.
Special Fire Fighting Procedures: None.
Unusual Fire and Explosion Hazards: None known.

REACTION DATA
Stability: Stable
Incompatibility: None known

Hazardous Decomposition Byproducts:
Nitrogen oxides and oxides of phosphorous upon thermal decomposition/fire conditions.

Hazardous Polymerization: Will not occur.
Conditions to Avoid: None

HEALTH HAZARD DATA
Routes of Entry:
Inhalation: Unlikely
Skin: Primary
Ingestion: Unlikely

Health Hazards Acute and Chronic:
Contact with concentrated solution as shipped, may cause irritation to eyes and skin. Due to the negligible vapor pressure of the hazardous ingredient in even the concentrated solution, inhalation is an unlikely health hazard.

Emergency and First Aid Procedures:
Eye Contact: Flush eyes with water for at least 15 minutes. Consult a physician if irritation persists.
Skin Contact: Wash thoroughly with plenty of soap and water. Consult a physician if irritation develops.
Ingestion: Give 2 glasses of water and induce vomiting. Call a physician.

CARCINOGENICITY:
None of the ingredients in this product are listed by IARC, NTP, or OSHA as carcinogenic.

Signs and Symptoms of Overexposure:
Prolonged skin contact may cause redness and irritation.

Medical Conditions Aggravated by Exposure:
Concentrated solution may aggravate an existing dermatitis.

PRECAUTIONS FOR USE AND DISPOSAL
Spills: Small spills should be flushed to sewer with large quantities of water. Large spills should be contained and pumped to salvage tank.

Waste Disposal: Discharge of used dilute working solution to a municipal treatment facility is acceptable in most jurisdictions.

Special Storage/Handling Precautions: None

CONTROL MEASURES
Respiratory Protection: Not required.
Ventilation: Local Mechanical XX Special
Eye Protection: Recommended
Gloves: Recommended for prolonged and repeated contact. (Butyl, rubber, or neoprene)

Other: An eye fountain should be located in any workplace when working with chemicals.

The information contained herein is furnished without warranty of any kind. Users should consider this data a supplement to other information gathered by them and are responsible for completeness of information to assure proper use of these materials and the safety and health of their employees.

*Listed chemical is subject to SARA TITLE III Section 313 reporting. 2-Butoxyethanol is a glycol ether.

PHYSICAL/CHEMICAL CHARACTERISTICS

Boiling Point: nd
Solubility in Water: Complete
% Volatiles (by Vol): 91
VOC by EPA METHOD 24 7.3 lb/gal, 875 gm/l, 92%
Density: 0.95 g/ml, 7.9 lb/gal
Appearance and Odor:
Very pale yellow liquid with characteristic odor.

FIRE AND EXPLOSION HAZARD DATA

Flash Point: 152 F (TCC)
Extinguishing Media:
CO2, dry chemical, foam, water spray.
Special Fire Fighting Procedures:
Use self-contained breathing apparatus for any fire involving chemicals.
Unusual Fire and Explosion Hazards:
None

REACTIVITY DATA

Stability: Stable
Incompatibility: None known
Hazardous Decomposition Byproducts:
Carbon dioxide/monooxide.
Hazardous Polymerization:
Will not occur.
Conditions to Avoid:
Heat, sparks and open flames.

HEALTH HAZARD DATA

Routes of Entry:
Inhalation  Skin  Ingestion
Primary  Secondary  Unlikely

Health Hazards Acute and Chronic:
Short term overexposure to concentrated solution may cause skin, eye or respiratory tract irritation. The low evaporation rate of 2-Butoxyethanol makes the inhalation risk low. Laboratory testing has shown that animals exposed to excessive concentrations for extended periods of time may develop liver, kidney, or blood disorders. Concentrated solution applied to the skin may be absorbed in harmful amounts.

Emergency and First Aid Procedures:
Skin Contact: Wash affected area with soap and water. Remove contaminated clothing.
Eye Contact: Flush eyes with water for at least 15 minutes. Consult a physician.
Inhalation: Remove to fresh air. Restore breathing if required. Get medical attention.
Ingestion: Give 2 glasses of water and induce vomiting. Call a physician. Get medical attention.

CARCINOGENICITY:
None of the ingredients in this product are listed by IARC, NTP, or OSHA as carcinogenic.

Signs and Symptoms of Overexposure:
Nausea, headache, dizziness and general weakness. Prolonged and widespread skin contact may cause swelling and damage to skin.

Medical Conditions Aggravated by Exposure:
Because of its irritating and defatting properties, this material may exacerbate an existing dermatitis.

PRECAUTIONS FOR USE AND DISPOSAL

Spills: Small spills should be flushed to sewer with large quantities of water. Large spills should be contained and pumped to salvage tank.

Waste Disposal: Discharge of used dilute working solution to municipal treatment plants is acceptable in most jurisdictions.

Special Storage/Handling Precautions:
None

CONTROL MEASURES

Respiratory Protection: Not normally required. Organic vapor respirator for unusual conditions.
Ventilation: Local Mechanical XX Special
Eye Protection: Recommended
Gloves: Recommended, butyl, rubber, or neoprene
Other: An eye fountain or safety shower should be located in workplace when working with chemicals.

*FORMERLY AQUANOL 643
