MATERIAL SAFETY DATA SHEET

SECTION 1 NAME & HAZARD SUMMARY

Material name:
BCF® (Halon 1211)

Physical hazards: Compressed gas
Health hazards: Harmful - cardiac sensitizor

Read the entire MSDS for a more thorough evaluation of the hazards.

SECTION 2 INGREDIENTS

<table>
<thead>
<tr>
<th>Ingredient</th>
<th>%</th>
<th>TLV (ACGIH)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bromochlorodifluoromethane (CAS 353-59-3)</td>
<td>100</td>
<td>Not listed</td>
</tr>
</tbody>
</table>

Ingredients not precisely identified are proprietary or nonhazardous. All ingredients appear on the EPA TSCA inventory. Values are not product specifications. gt = greater than, lt = less than, ca = approximately

SECTION 3 PHYSICAL DATA

Boiling point: 26°F
Vapor pressure: 15 psig at 15.6°C
Vapor density (air = 1): 5.7
Solubility in water: Insoluble
pH: No data
Specific gravity: 1.83 (liquid)
% Volatile by volume: 100
Appearance and odor: Colorless gas or colorless volatile liquid with very faint sweet odor

SECTION 4 FIRE AND EXPLOSION HAZARD DATA

Flash point (and method): Does not flash
Autoignition temp.: None
Flammable limits (STP): None

Extinguishing media:
Not applicable; product is an extinguishing agent. Use water to cool fire-exposed cylinders or other containers.

Special fire fighting protective equipment:
Self-contained breathing apparatus with full facepiece and protective clothing when re-entering unventilated fire areas where product has been used.
MATERIAL SAFETY DATA SHEET (continued)

BCF® (Halon 1211)

SECTION 4  FIRE AND EXPLOSION HAZARD DATA (continued)

Unusual fire and explosion hazards:
When BCF is discharged onto a fire, it decomposes above 900°F, releasing bromide
ions, the extinguishing agent. However, halogen acids and small amounts of
carbonyl halides are also formed. These byproducts, although harmful if inhaled,
are easily detected; only a few parts per million create an unpleasant, acrid odor,
which serves as a warning to the user. After the extinguisher is discharged, the
area should be vacated until ventilation clears the atmosphere.

SECTION 5  REACTIVITY DATA

Stability:
Stable under normal conditions. Decomposes under fire conditions (above 900°F).

Incompatibility (materials to avoid):
Active metals such as powdered aluminum and magnesium, and fires of metal hydrides.

Hazardous decomposition products:
Thermal decomposition: BCF begins decomposing at temperatures above 900°F to give
free halogens, halogen acids, and small amounts of carbonyl halides.

Hazardous polymerization:
Will not occur.

SECTION 6  HEALTH HAZARD ASSESSMENT

General:
The health hazard assessment is based on a combination of available toxicity
information and human experience.

Ingestion:
Ingestion is not likely to occur since this material is a gas at room temperature.

Eye contact:
The liquid form of this material can produce chilling sensations and discomfort.

Skin contact:
Evaporation of liquid from the skin can produce chilling sensations. Skin injury
does not result.

Skin absorption:
Systemically toxic concentrations are unlikely to be absorbed through the skin in
man.

Inhalation:
Exposures to concentrations of this material above 5% for longer than one minute
can cause toxic side effects.

Other effects of overexposure:
Prolonged exposures can cause dizziness, headache, nausea, impaired coordination
progressing to unconsciousness. In susceptible individuals, cardiac sensitization
to circulating epinephrine compounds can result in sudden, fatal heart arrhythmias.
MATERIAL SAFETY DATA SHEET (continued)  

SECTION 6 HEALTH HAZARD ASSESSMENT (continued)  

First aid procedures:  
Skin: Wash material off the skin with copious amounts of soap and water. If redness, itching or a burning sensation develops, get medical attention.  
Eyes: Immediately flush with copious amounts of water for at least 15 minutes. If redness, itching or a burning sensation develops, have eyes examined and treated by medical personnel.  
Ingestion: Give 1 or 2 glasses of warm water to drink and get medical attention.  
DO NOT induce vomiting. Have victim lie down and keep warm. (Never give anything by mouth to an unconscious person.)  
Inhalation: Remove victim to fresh air. If cough or other respiratory symptoms develop, consult medical personnel. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. Consult medical personnel.  
Note to Physician: Product can induce cardiac muscle sensitization to circulating epinephrine-like compounds. Do NOT give adrenalin or similar sympathomimetic drugs. Do NOT allow a victim to exercise until 24 hours following specific exposures. Freeze burns of mucosal tissue can develop following contact with liquid form of this material.

SECTION 7 SPILL OR LEAK PROCEDURES  
Steps to be taken in case material is released or spilled:  
Ventilate spill area and recover any liquid. Protect against frostbite from evaporating liquid.

Disposal method:  
Not applicable.

Container disposal:  
Not applicable.

SECTION 8 SPECIAL PROTECTION INFORMATION  
TLV® or suggested control value:  
No TLV assigned by ACGIH. Badger operates its facilities such that employee exposure to this material is kept below 1000 ppm as an 8-hour TWA.

Ventilation:  
Ventilate low-lying areas, such as, sumps or pits where dense vapors may collect. Use local exhaust to control exposures.

Respiratory protection (specify type):  
Not normally needed if controls are adequate. If needed, use MSHA/NIOSH approved respirator for organic vapors. For high concentrations and oxygen-deficient atmospheres, use positive pressure air-supplied respirator.

Protective clothing:  
Impervious gloves and apron to protect against liquid exposure.

Eye protection:  
Chemical tight goggles; full faceshield in addition if splashing is possible.
SECTION 8 SPECIAL PROTECTION INFORMATION (continued)

Other protective equipment:
Eyewash station and safety shower in work area when working with liquified product.

SECTION 9 SPECIAL PRECAUTIONS OR OTHER COMMENTS

Precautions to be taken in handling or storing:
Store in a cool area with good ventilation. Keep vapors away from high temperature surfaces to avoid toxic and corrosive decomposition products. Enforce "NO SMOKING" rules in areas of use.

The information herein is given in good faith but no warranty, expressed or implied, is made.
