Section 3 - Hazards Identification

EMERGENCY OVERVIEW
Appearance: white, light yellow, light gray. **Danger!** Corrosive. Contact with skin causes irritation and possible burns, especially if the skin is wet or moist. May cause severe eye irritation and possible injury. May cause severe respiratory and digestive tract irritation with possible burns. Eye contact may result in permanent eye damage.

**Target Organs:** Eyes.

**Potential Health Effects**

**Eye:** May result in corneal injury. Contact with liquid or vapor causes severe burns and possible irreversible eye damage.

**Skin:** Contact with skin causes irritation and possible burns, especially if the skin is wet or moist. May cause deep, penetrating ulcers of the skin.

**Ingestion:** Causes gastrointestinal tract burns. May cause circulatory system failure. May cause perforation of the digestive tract. Causes severe pain, nausea, vomiting, diarrhea, and shock.

**Inhalation:** Causes respiratory tract irritation. May cause chemical bronchitis with coughing and difficulty in breathing.

**Chronic:** Prolonged or repeated skin contact may cause dermatitis. Chronic inhalation and ingestion may cause effects similar to those of acute inhalation and ingestion. Repeated inhalation may cause perforation of the nasal septum.

**Section 4 - First Aid Measures**

**Eyes:** Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower lids. Get medical aid immediately. Do NOT allow victim to rub or keep eyes closed.

**Skin:** Get medical aid immediately. Immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Remove contaminated clothing and shoes.

**Ingestion:** Do NOT induce vomiting. If victim is conscious and alert, give 2-4 cupfuls of milk or water. Get medical aid immediately.

**Inhalation:** Get medical aid immediately. Remove from exposure to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

**Notes to Physician:** Treat symptomatically and supportively.

**Antidote:** No specific antidote exists.

**Section 5 - Firefighting Measures**

**General Information:** As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Substance is nonflammable. Use water with caution and in flooding amounts. Reacts violently with water.

**Extinguishing Media:** Use water spray to cool fire-exposed containers. Do NOT use carbon dioxide. Use extinguishing media most appropriate for the surrounding fire. Do NOT use halogenated agents. Use flooding quantities of water.

**Autoignition Temperature:** Not available.

**Flash Point:** Noncombustible.

**NFPA Rating:** Health=3, Flammability=0, Reactivity=1 Explosion Limits, Lower:
General Information: Use proper personal protective equipment as indicated in Section 8.
Spills/Leaks: Sweep up or absorb material, then place into a suitable clean, dry, closed container for disposal. Avoid generating dusty conditions.

Handling: Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Keep container tightly closed. Avoid contact with clothing and other combustible materials. Do not get on skin or in eyes. Do not ingest or inhale. Storage: Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances. Keep away from water. Store in glass containers.

Engineering Controls: Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.
