Section 3 - Hazards Identification

EMERGENCY OVERVIEW

Appearance: white to off-white. **Warning!** May cause allergic skin reaction. This substance has caused adverse reproductive and fetal effects in animals. Harmful if swallowed. May cause methemoglobinemia. Eye contact may result in permanent eye damage. May cause digestive tract irritation with nausea, vomi
and diarrhea. May cause cancer-based on animal studies. **Target Organs:** Central nervous system, respiratory system.

**Potential Health Effects**

**Eye:** May cause eye irritation. Repeated exposure may cause corneal abnormalities including structural changes and brownish discoloration which can lead to decreased visual acuity and blindness.

**Skin:** Causes severe skin irritation. May cause skin sensitization, an allergic reaction, which becomes evident upon re-exposure to this material. Repeated exposure may cause hyperpigmentation of fair skin and depigmentation of dark skin.

**Ingestion:** May cause respiratory failure. May cause methemoglobinemia, cyanosis, convulsions, and death. May cause severe irritation of the digestive tract. May cause ringing ears, muscle tremors, and breathing difficulty.

**Inhalation:** May cause respiratory tract irritation.

**Chronic:** Prolonged or repeated skin contact may cause sensitization, dermatitis and possible destruction and/or ulceration.

---

**Section 4 - First Aid Measures**

**Eyes:** Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower lids. Get medical aid immediately. Do NOT allow victim to rub or keep eyes closed.

**Skin:** Get medical aid. Immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes.

**Ingestion:** If victim is conscious and alert, give 2-4 cupsfuls of milk or water. Get medical aid immediately.

**Inhalation:** Remove from exposure to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid.

**Notes to Physician:** Treat symptomatically and supportively.

**Antidote:** No specific antidote exists.

---

**Section 5 - Firefighting Measures**

**General Information:** As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Dusts at sufficient concentrations can form explosive mixtures with air.

**Extinguishing Media:** For small fires, use water spray, dry chemical, carbon dioxide or chem foam.

**Autoignition Temperature:** 960 deg F (515.56 deg C)

**Flash Point:** 329 deg F (165.00 deg C)

**NFPA Rating:** flammability-1; reactivity-0; *See list description Explosion Limits, Lower: Not available. Upper: Not available.

---

**Section 6 - Accidental Release Measures**

**General Information:** Use proper personal protective equipment as indicated in Section 8.

**Spills/Leaks:** Wear a self contained breathing apparatus and appropriate Personal protection Exposure Controls, Personal Protection section). Sweep up, then place into a suitable contain disposal. Avoid generating dusty conditions.

---

**Section 7 - Handling and Storage**

**Handling:** Wash thoroughly after handling. Remove contaminated clothing and wash before reuse with adequate ventilation. Minimize dust generation and accumulation. Avoid contact with skin, and clothing. Keep container tightly closed. Do not ingest or inhale.
Storage: Keep away from sources of ignition. Do not store in direct sunlight. Keep from conta
oxidizing materials. Store in a cool, dry, well-ventilated area away from incompatible substanc

Section 8 - Exposure Controls, Personal Protection

Engineering Controls: Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.
