SECTION 3: HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Flammable Aerosol! Heated can may rupture. Eye and skin irritant.
Inhalation may cause headache, dizziness and drowsiness. Deliberate concentration and inhalation of vapors may be fatal.

POTENTIAL HEALTH EFFECTS:

ACUTE HAZARDS:

INHALATION: Breathing vapors or mists may cause mild irritation of the mucous membranes, headache, dizziness and drowsiness.

SKIN CONTACT: May cause mild irritation and defatting of the skin.

SKIN ABSORPTION: Prolonged, extensive skin contact may cause absorption of 2-butoxyethanol in harmful amounts.

EYE CONTACT: May cause mild irritation.
INGESTION: May cause gastrointestinal irritation and nausea. Large amounts swallowed may cause pulmonary edema, acidosis, hypotension and renal (kidney) injury. Massive ingestions consistently cause metabolic acidosis.

CHRONIC HAZARDS: Prolonged overexposure to 2-butoxyethanol may cause blood, liver and kidney damage. Prolonged skin exposure may cause dermatitis.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: The skin irritating properties of this product may aggravate an existing skin condition, e.g. eczema.

CARCINOGEN: None of the components of this product are listed as a carcinogen or suspected carcinogen by NTP, NTP or OSHA.

SECTION 4: FIRST AID MEASURES

INHALATION: If symptoms of exposure occur, remove to fresh air and seek medical attention.

SKIN CONTACT: Remove contaminated clothing. Wash all affected and exposed areas with soap and water. If irritation or redness occurs and persists, seek medical attention.

EYE CONTACT: Exposed eyes should be immediately flushed with copious amounts of water using a steady stream for a minimum of 15 minutes. If irritation, pain, swelling or tearing develop seek immediate medical attention.

INGESTION: Ingestion is an unlikely route of exposure for aerosol products. If ingestion occurs rinse mouth with a small amount of water. Immediately call local poison control center or go to an emergency department. Never give anything by mouth to an unconscious or drowsy person.

NOTES TO PHYSICIAN: There is no specific antidote. Treatment should be directed at the control of symptoms and the clinical condition. Closely monitor acid-base, fluid and electrolyte status. The role of ethanol therapy in preventing ethylene glycol butyl ether toxicity is uncertain but its protective effect has been inferred from animal studies. The poison center should be consulted on these cases.
