Other Mautz products not listed above are covered by MSD Sheet # MS011-24.

- This product contains pigments which may become a dust nuisance when removed by abrasive blasting, sanding or grinding, or when applied by spray methods which create overspray and dry spray.
- This product may contain added heavy metals (chromium, barium, etc.), and may not pass the TCLP test for heavy metals.
- This product may contain one or more reported carcinogens or suspected carcinogens which are noted by NTP, IARC, OSHA OR ACGIH
2b. Individual Jurisdiction Reporting

Pursuant the California Safety Drinking Water and Toxic Enforcement Act of 1986 (commonly known as Proposition 65), it has not been feasible or practical to subject all products to the detailed analyses required to determine whether each of the materials known to California to cause cancer or reproductive toxicity is present in detectable quantities. However, based on available data, the following chemicals listed by the governor of California may be present in this product:

3. Physical Data

**BOILING RANGE:** 160-293°F  
**VAPOR DENSITY:** Heavier than air  
**EVAPORATION RATE:** Slower than n-Butyl Acetate  
**PERCENT VOLATILE BY VOLUME:** See table enclosed  
**WEIGHT PER GALLON:** 9.5 lbs typical

4. Fire and Explosion Hazard Data

**DOT CATEGORY:** 3(Flammable Liquid)  
**OSHA/NFPA CLASSIFICATION:** Combustible Liquid-Class IB, IC  
**FLASH POINT:** 20-99°F  
**TCO**  
**EXTINGUISHING MEDIA:** Carbon Dioxide, Dry Chemical, or Foam (NFPA Class B Extinguisher)  
**UNUSUAL FIRE AND EXPLOSION HAZARDS:** Containers should be kept tightly closed. Keep away from heat, open flame, electrical equip., sparks. To avoid spontaneous combustion during temporary storage, soak soiled rags, collection filters, and waste immediately after use, in a water-filled closed metal container.  
**SPECIAL FIRE FIGHTING PROCEDURES:** Water may be used to cool containers to reduce rate of burning and resist additional ignition or explosion.  
**THRESHOLD LIMIT VALUE:** See Hazardous Ingredients  
**EFFECTS OF OVERTOSURES:**  
**Inhalation:** Irritation of eyes and respiratory tract; headache, dizziness and nausea.  
**Skin:** Irritant. Reports have shown repeated and prolonged occupational overexposure to solvents can result in permanent brain and skin damage.  
**EMERGENCY AND FIRST AID PROCEDURES:**  
**Inhalation:** Remove to fresh air. Restore breathing if necessary. Notify a physician.  
**Eye Contact:** Flush with water. Notify a physician.  
**Skin Contact:** Wash with soap and water. Contaminated clothing should be removed and washed prior to reuse.

5. Health Hazard Data

**THRESHOLD LIMIT VALUE:** See Hazardous Ingredients  
**EFFECTS OF OVERTOSURES:**  
**Inhalation:** Irritation of eyes and respiratory tract; headache, dizziness and nausea. Since product may contain some Crystalline Silica, continued long-term exposure to breathable quantities of spray mist or dust from abrading surfaces in excess of the PEL or TLV listed above can lead to silicosis, a progressive, sometimes fatal lung disease. Persons with pre-existing upper respiratory tract and lung diseases such as bronchitis, emphysema, and asthma may have the condition aggravated by such exposure. Crystalline silica has also been determined by IARC to be a "probable carcinogen," but has not been classified as such by OSHA or NTP.  
**Skin:** Irritant. Reports have shown repeated and prolonged occupational overexposure to solvents can result in permanent brain and skin damage.  
**EMERGENCY AND FIRST AID PROCEDURES:**  
**Inhalation:** Remove to fresh air. Restore breathing if necessary. Notify a physician.  
**Eye Contact:** Flush with water. Notify a physician.  
**Skin Contact:** Wash with soap and water. Contaminated clothing should be removed and washed prior to reuse.
6. REACTIVITY DATA

STABILITY: Stable
INCOMPATIBILITY: Avoid strong Oxidizers.

HAZARDOUS DECOMPOSITION PRODUCTS:
Combustion will produce Carbon Monoxide & Carbon Dioxide

HAZARDOUS POLYMERIZATION: Will not occur.

CONDITIONS TO AVOID: Heat, Open Flame, Sparks.

7. SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Eliminate ALL sources of ignition. Ventilate area. Soak up spill with absorbent material (sawdust). Remove with grounded (non sparking) equipment.

WASTE DISPOSAL METHOD:
Incinerate under safe conditions. Disposal should be in accordance with local, state, and federal regulations.

8. SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION: Use NIOSH approved chemical cartridge respirator (TC23C) to remove solid airborne particles and solvent vapors from overspray during application. This product may contain encapsulated crystalline silica. Wear appropriately fitted, NIOSH approved respirators when applying by spray or in sanding the dried film. Maintain proper ventilation to keep free crystalline silica levels below 2mg/m³ (for dusts and spray vapors). Concentrated areas or spray application may require NIOSH approved chemical respirator (TC23C) to remove airborne particles and vapors during application.

VENTILATION:
Use local exhaust to maintain TLV of most hazardous ingredient (SEE HAZARDOUS INGREDIENTS) below acceptable limit.

PROTECTIVE GLOVES: Yes

EYE PROTECTION: Safety glasses designed to protect eyes from liquid splash.

OTHER PROTECTIVE EQUIPMENT: Eye Bath/Safety Shower.

9. SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN WHEN HANDLING AND STORING:
Keep away from heat, open flame or sparks. Store in an area suitable for Flammable or Combustible liquids.

OTHER PRECAUTIONS: Not to be taken internally. Close Can when not in use to avoid emission of VOC's.
