Install Cisco AnyConnect VPN Client - Mac

OVERVIEW

This guide will walk you through the steps to install and launch the Cisco AnyConnect VPN client on your Mac computer.

Installing the VPN Client

Step 1

Open a browser and go to vpn.uww.edu.

Step 2

Enter your Net-ID and password. Click **Login** to continue.

Step 3

Select **AnyConnect** from the left hand-side toolbar.

Click the **Start AnyConnect** link.

Step 5

You may be prompted to download Sun Microsystems's Java Runtime Environment. Please do so now if prompted. Your version of Java should be version 1.4 or newer.

If prompted to manually download the Mac OS X 10.6+ (Intel) client, click the link provided to begin the download.

Skip to step 7 if you do not receive either of the prompts above.

Login

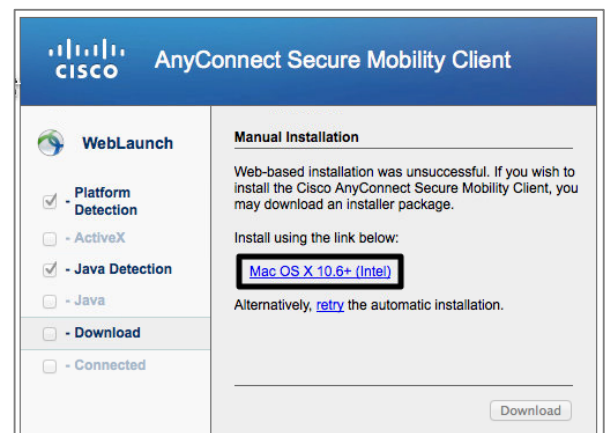

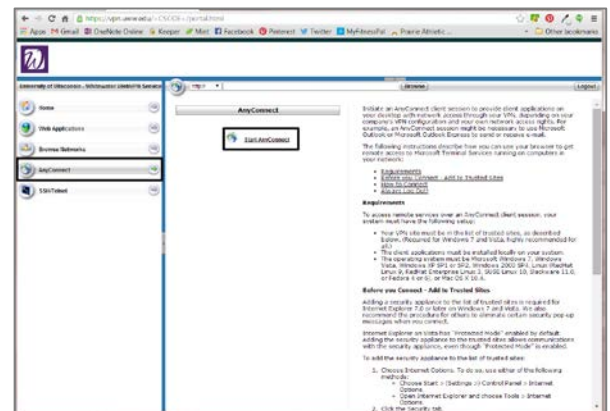

Please enter your username and password.

GROUP: default

USERNAME: Net-ID

PASSWORD: *****

Login

Step 6

Select "Open with: DiskImageMounter" and click **OK**.

The installer will now download.

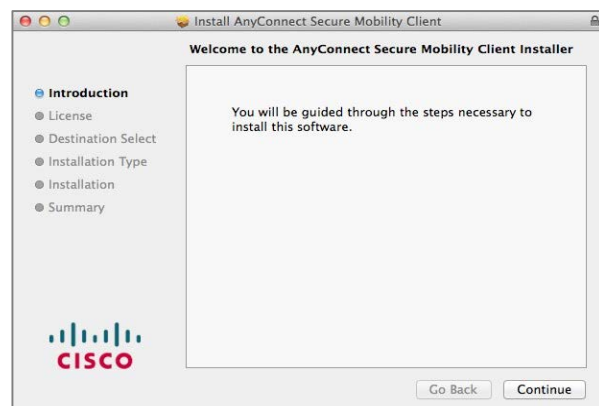

Step 7

Double-click the vpn.pkg file to launch the installer.

Step 8

Click **Continue** and follow the on-screen prompts to install the AnyConnect software on your computer. If prompted to accept the software license agreement, click **Agree**.

Step 9

You may be asked to enter a user name and password to complete the installation. Please enter your "Mac" user name and password here. Click **Install Software** to continue.

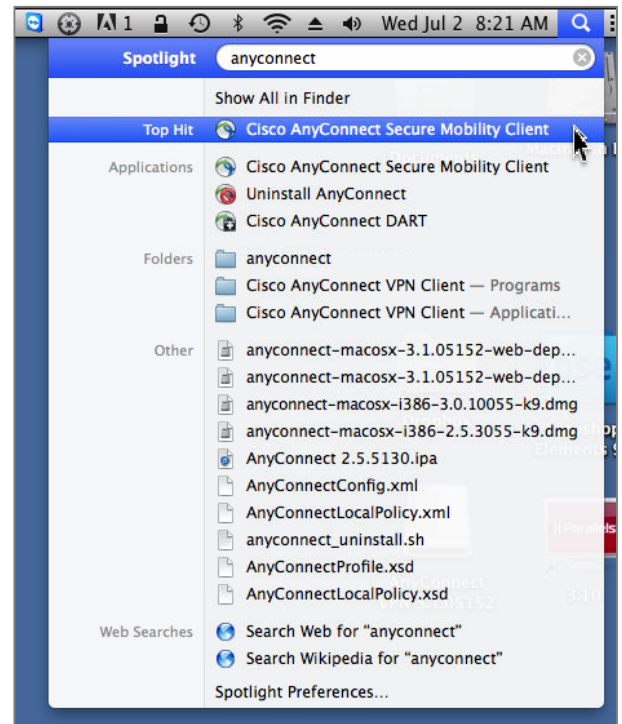

Step 10

Once the installation is complete, click the **Close** button.

Launching the VPN Client

Step 1

Click on the magnifying glass located in the upper right-hand corner of the screen. In the search bar, type in "AnyConnect." Select **Cisco AnyConnect Secure Mobility Client**.

Step 2

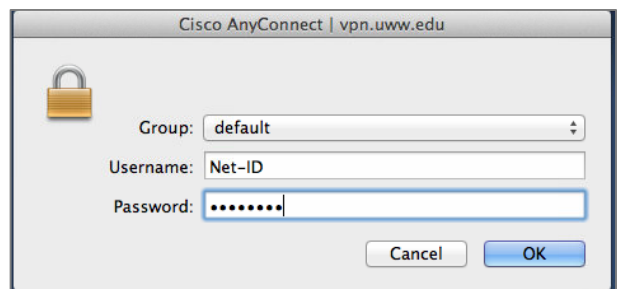

Enter "vpn.uww.edu" in the available text box and click **Connect**.

Step 3

Enter your Net-ID and password. Click **OK** to continue.

Once successfully logged in, an AnyConnect icon with a lock will appear in the upper right-hand toolbar. 

To disconnect from the VPN session, right click on the AnyConnect icon in the upper right-hand toolbar and click **Disconnect**.

Trouble Downloading or Installing?
