## UWW Wireless: Connecting Laptop to Wireless as a Guest

### OVERVIEW

This guide will walk you through the steps to connect your laptop device to the UWW wireless network as a guest device.

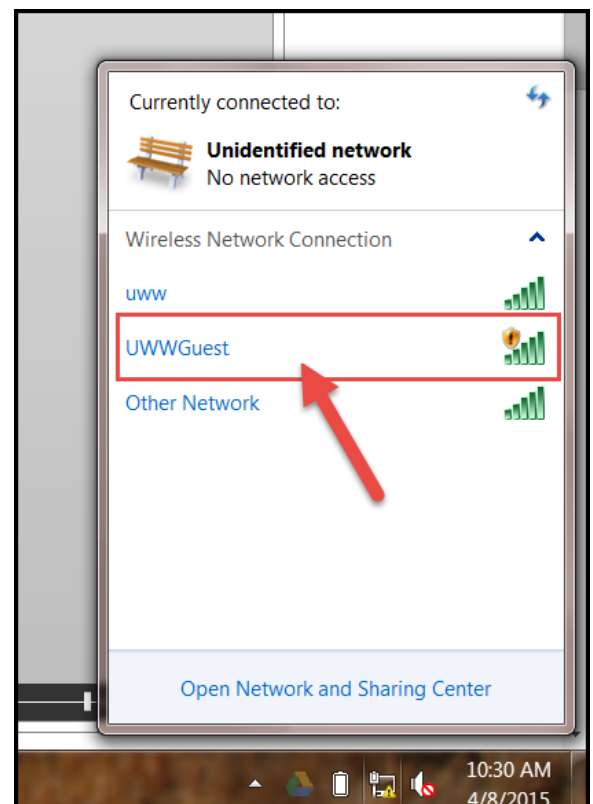

**Note:** Guest devices connecting to wireless will only stay active in the system for up to 12 hours. At that time the device must go through the guest wireless registration process again.

#### Step 1.

From your computer, locate your wireless connectivity icon.

Select “UWWGuest” from the WI-FI menu options.

A web browser should now open automatically for you. If not, open a web browser to launch the UWW Wi-Fi registration page and browse to any non-uww webpage, such as google.com or msn.com to be redirected to the UW-Whitewater wireless device registration page.

## Step 2.

**Guests:** Please read through the information provided about guest accounts. Then scroll down to the bottom of the page to enter your guest wireless credentials.

## Step 3.

Read through, then accept the “Acceptable Use Policy”.

Tap the **Accept** button to continue.

**NOTE:** Tap the **Not Now** button if prompted to save your password.

## Step 4.

You will be prompted to change your temporary guest wireless password. Please enter the current temporary password, then your new password in the “New password” and “Confirm password” boxes available.

Welcome to the University of Wisconsin - Whitewater!

**Guests**

Guests of UW-Whitewater may use the guest wireless network for basic internet access during their visit. A guest may have up to 3 devices connected at any one time. Guest accounts are valid 12 hours from the time of creation.

Guests without an account should click the link below the login section to create an account through the self-provisioning system. If you already have an account that is not expired enter the username and password given to you at the end of the self-provisioning process.

**Warhawk Community (Students, Faculty, and Staff)**

You can use this network to provision your iPhone and iPad devices to use the secure uww-wifi network. After logging in with your NetID and password you will be guided through a device provisioning process. Users with devices other than iPhone's and iPad's should connect to the uww-wifi wireless network with their NetID and password manually. Additional device provisioning support will be added at a later time.

**Future or Past Warhawks (Alumni, Admitted Students, and Applicants)**

If you have a valid NetID and password you can login below and be granted access to the wireless network.

**Acceptable Use Policy**

Please read the Acceptable Use Policy

This Policy is a guide to the acceptable use of the Innovation Center network and services (Services). Any individual connected to the Innovation Center network in order to use it directly, or to connect to any other network(s), must comply with this policy and Acceptable Use policies of any other network(s) or host(s) used. The following guidelines will be applied to determine whether or not a particular use of the Services is appropriate:

1. Users must respect the privacy of others. Users shall not intentionally seek information on, or represent

### Step 5.

You will now see a page indicating that you are successfully connected to the UWW wireless network.

You can either close the browser window or type in a new webpage URL at this time.
