Ball Seed

Dear Customer:

Under the provisions of the OSHA Hazardous Communication Standard, Ball Seed Company is required to provide you a Material Safety Data Sheet (MSDS) for each chemical used by us in the treatment of seed or in the pretreatment of seed by our suppliers.

We currently treat and/or package flower and vegetable seeds treated with the chemicals listed below:

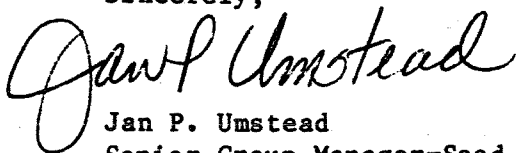

1. Captan
2. Thiram
3. Benlate

Each package of treated seed from Ball Seed Company is prominently printed with the chemical used in the accordance with existing Federal Regulation.

Attached are current MSDS on each of the above listed chemicals which were furnished by the chemical supplier.

If you have any questions concerning the enclosed, please do not hesitate to contact me.

Sincerely,

Jan P. Umstead
Senior Group Manager-Seed
