DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR A LUXURIOUS, WEED FREE LAWN

The 12-4-8 fertilizer stimulates grass growth to quickly conceal spots where weeds have died. Kills weeds and grows healthy green grass in one application.

EFFECTIVE WEED CONTROL

Kills many common weeds, including buckhorn, dandelion, chickweed, clover, ground ivy, knotweed, plantain.

FOR ESTABLISHED LAWNS

Will not harm most lawn grasses. May cause some temporary browning, particularly on Seaside, Arlington and Congressional bent grasses. If browning is noted, water thoroughly to expedite recovery.

SUGGESTED SPREADER SETTINGS

Spreader	Speed		Width of Coverage	Settings
	Ground MPH	PTO RPM		4 lbs. per 1,000 sq. ft.
Jet-Spread®	3		8 ft.	4 1/4
Cyclone	3		8 ft.	4 1/4
Ezee Flow (108)	5	540	30 ft.	C2 1/2
Lely (HR)	5		39 ft.	6 1/2 II
Lely (W)	5	425	39 ft.	6 II
Scotts (Rotary)	3		6 ft.	H
Scotts (Rotary) RTX	3		10 ft.	G

These settings were calibrated and field tested. However, age and condition of spreader, speed of operation, and evenness of terrain may require slightly different settings for desired coverage, 8 qt per 100 sq. ft.

The best time to destroy weeds is when they are young and actively growing, before they crowd out desirable grasses. Apply at the rate of 4 lbs. per 1,000 sq. ft., in Spring or early Fall, when ground moisture is adequate and weeds are actively growing. Apply when grass is wet from recent rain, dew, or sprinkling to get most effective herbicide action. If used during dry period, water lawn thoroughly 24 hours prior to application.

For persistent weeds, when weeds reappear, or if a heavy rain occurs within 2 days after application, a second application may be necessary.

Apply to new lawns only after 2nd or 3rd mowing. Do not apply to very young grass, or to predominantly bent grass turf.

Do not mow, water, or make heavy use of lawn for at least 24 hours after application.

Clean spreader thoroughly after use.

Vapors from this product may injure susceptible plants in the immediate vicinity. Bentgrass, St. Augustine grass, Dichondra, clover and Carpetgrass may be injured. Avoid drift to susceptible plants, as this product may injure flowers, ornamentals, and vegetables.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.
STORAGE: Keep in original container in a cool, dry area, away from extreme heat and direct sunlight. Do not store near food, feed, seeds or other pesticides.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
