MATERIAL SAFETY DATA SHEET
EASTMAN KODAK COMPANY

Date of Revision: 04/11/90
Accession Number: 354617

PRODUCT INFORMATION

Product Name: KODAK Fixer
Formula: Solid Mixture
Kodak Catalog Number(s): CAT 197 1720 - To Make 1 Quart; CAT 197 1738 - To Make 1/2 Gallons; CAT 197 1746 - To Make 1 Gallon; CAT 197 1753 - To Make 5 Gallons; CAT 123 4699 - To Make 32 Ounces; CAT 123 8146 - To Make 128 Ounces
Mixture Number: 713
Kodak Hazard Rating Codes: R: 1 S: 1 F: 1 C: 0

Manufacturer/Supplier:
Eastman Kodak Company
343 State Street
Rochester, New York 14650
USA
For Emergency Information: (716) 722-5151
For other purposes, call the Marketing and Distribution Center in your area.

PHYSICAL DATA

Appearance and Odor: White powder; odorless
Melting Point: Not Available
Vapor Pressure: Negligible
Evaporation Rate (n-butyl acetate = 1): Negligible
Vapor Density (Air = 1): Not Applicable
Volatile Fraction by Weight: Negligible
Specific Gravity (H2O = 1): GT 1.0
Solubility in Water (by Weight): Appreciable

GT = Greater than; LT = Less than

D-0006.000E
82-0007
FIRE AND EXPLOSION HAZARD

FLASH POINT: None

EXTINGUISHING MEDIA: Water spray, Dry chemical, Carbon dioxide

SPECIAL FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus and protective clothing.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Fire or excessive heat may cause production of hazardous decomposition products. This material, like most organic materials in powder form, is capable of creating a dust explosion.

REACTIVITY DATA

STABILITY: Stable

INCOMPATIBILITY: Strong acids, Strong oxidizers.

HAZARDOUS DECOMPOSITION PRODUCTS: Combustion will produce carbon dioxide and probably carbon monoxide. Oxides of sulfur may also be present.

CONDITIONS CONTRIBUTING TO HAZARDOUS POLYMERIZATION: Will not occur.

TOXICOLOGICAL PROPERTIES

EXPOSURE LIMITS:
Component: Sodium metabisulfite
ACGIH TLV: 5mg/m³ - TWA (ACGIH 1989-1990)
OSHA PEL: 5mg/m³ - TWA

Component: Boric anhydride
ACGIH TLV: 10mg/m³ - TWA (ACGIH 1989-1990)
OSHA PEL: 10mg/m³ - Total Dust; 5mg/m³ - respirable fraction - TWA

EXPOSURE EFFECTS:
Inhalation: Low hazard for recommended handling.

Eyes: No specific hazard known. May cause transient irritation.

Skin: Low hazard for recommended handling.

Ingestion: Expected to be a low ingestion hazard.

PROTECTION AND PREVENTIVE MEASURES

VENTILATION: Good ventilation should be sufficient. Supplementary ventilation or respiratory protection may be needed in special circumstances.

*Typically, 10 room volumes per hour is considered good general ventilation: ventilation rates should be matched to conditions of use. Remove to fresh air following overexposure.

RESPIRATORY PROTECTION: None should be needed.
SKIN AND EYE PROTECTION: Safety glasses recommended in industrial operations involving chemicals. If prolonged or repeated contact is necessary, gloves or other protection may be required.

STORAGE AND DISPOSAL

SPECIAL STORAGE AND HANDLING PRECAUTIONS: Keep container tightly closed and away from acids. Keep from contact with oxidizing materials.

SPILL, LEAK, AND DISPOSAL PROCEDURES: Flush to an acid-free sewer with large amounts of water. Discharge, treatment, or disposal may be subject to federal, state, or local laws.

FIRST AID

Eyes: In case of eye contact, flush with plenty of water.

ENVIRONMENTAL EFFECTS DATA

This environmental effects summary is written to assist in addressing emergencies created by an accidental spill, which might occur during the shipment of this product, and in general, it is not meant to address discharges to sanitary sewers or publicly owned treatment works.

Some laboratory test data and published data are available for the major components of this formulation. Although this product, as such, has not been tested for environmental effects, the data, mentioned above, have been used to provide the following estimates of potential environmental impact, in the event of an accidental spill: (1-6)

This chemical formulation has a moderate biological oxygen demand, and it may cause some oxygen depletion in aquatic systems. It is expected to have a low potential to affect aquatic organisms, secondary waste treatment microorganisms, and the germination and growth of some plants. The components of this chemical formulation are biodegradable and are not likely to biocumulate. If diluted with a large amount of water, this chemical formulation released into the environment is not expected to have a significant impact.

TRANSPORTATION
