COMPOSITION/INFORMATION ON INGREDIENTS Section 2:

General Description:

White granular mixture; forms oxygen, hydrogen peroxide and soda ash

when mixed with water.

Hazardous Ingredients:

Ingredients not precisely identified are proprietary or nonhazardous

CAS#	Chemical name	%'age range
15630-89-4	Sodium percarbonate	50-70%
497-19-8	Sodium carbonate (soda ash)	30-50%
		

HAZARDS IDENTIFICATION Section 3:

This product is a consumer product. To the extent the product is used in a fashion typical to that of a consumer, protective measures, with the exception of those indicated on the label, are not normally necessary. Where use conditions and/or extent and duration of exposure differ from typical consumer use, however, appropriate protective measures to prevent eye and prolonged skin contact (glasses, goggles, rubber gloves, protective clothing) and minimize inhalation exposure (engineering controls, NIOSH-approved respiratory protection appropriate for the hazard presented) are recommended.

General:

Harmful if swallowed, irritating to eyes. Contamination may cause

decomposition. Not flammable, but damp material decomposes

exothermically.

Emergency:

Seek medical attention for eye exposure and ingestion

Primary Route(s) of Entry:

Eye, skin contact, inhalation, ingestion

Effects of Overexposure-

Dust inhalation may cause irritation of respiratory tract; may cause

dizziness, drowsiness, headache, nausea and vomiting.

Inhalation:

Harmful if swallowed

Effects of Overexposure-Indestion:

Effects of Overexposure-Eyes: Effects of Overexposure-Skin:

Extremely irritating to the eyes and may cause severe damage Slightly irritating to the skin; solvent action can dry the skin.

Effects of Overexposure-Chronic

None known

Hazards:

Section 4: FIRST AID MEASURES

Skin:

Wash with water and soap and rinse thoroughly. If skin irritation continues, consult

a doctor.

Eyes:

Flush eyes immediately with water for 15 minutes. Consult doctor.

Ingestion:

Do not induce vomiting. Rinse mouth with water and consult a doctor.

Inhalation:

Remove to fresh air. Administer oxygen if needed. Apply artificial respiration if

breathing has stopped. Seek medical attention if symptoms exist.

Section 5: FIRE FIGHTING MEASURES

Flashpoint and

NA (Non flammable)

Flammable limit:

NA

Flammable limit:

NA

method used:

(LEL)

(UEL)

Auto-ignition temperature:

NA - product is not self igniting

Extinguishing media:

CO2, extinguishing powder or water spray.

Special fire-fighting

Breathing apparatus

protective equipment:

Unusual fire and explosion

hazards:

Material decomposes exothermically when damp. Rapid oxygen evolution

may increase intensity of a fire. Keep separate from oxidizers, flammables

and reducing agents.

Explosion data:

ND

Section 6: ACCIDENTAL RELEASE MEASURES

Personal protective

equipment:

Large spills: self contained breathing apparatus. Small spills from

consumer size packaging: avoid breathing dust.

Material release or spill:

Ventilate area. Sweep up and place in waste containers for disposal. Flush

area well with water.

Other:

Dispose of in accordance with local, state and federal regulations.

Material collected may be disposed in a permitted landfill in accordance with state, local and federal regulations. Empty container may retain

product residue.

Section 7: HANDLING AND STORAGE

Storage:

Store and use in a cool, dry, well ventilated area. Do not store above 120

deg. F (48 deg C.).

Precautions during

Do not spray solution in eyes. Do not take internally. See product label for

handling and storage:

additional information

Exposure limits:

ND

Engineering controls:

General protective and hygienic measures. Keep away from foodstuffs,

beverages and food. Keep cool and dry.

Eye protection:

None under normal use. Use of safety glasses with splash quards or full

face shield is recommended for industrial applications

Protective clothing:

Solvent resistant gloves for prolonged or repeated contact.

Respiratory protection:

None required if room is well ventilated. If vapors are present, use NIOSH

or MSDA approved respiratory equipment.

Other PPE:

None

Section 10:

STABILITY AND REACTIVITY

Stability:

No decomposition if used according to specifications

Incompatibility:

Oxidizers. Reducing agents, flammable substances

Conditions to avoid:

Temperatures above 55 deg C (130 deg F). High humidity levels

Hazardous decomposition: Hazardous polymerization: No hazardous decomposition products are known No hazardous polymerization products are known

Section 11:

TOXICOLOGICAL PROPERTIES

Acute oral toxicity

No toxic chemical(s) subject to the reporting requirements of Section 313

of Title III and of 40 CFR372 are present.

Carcinogenicity:

Not listed as a carcinogen by ACGIH, IARC, NTP, OSHA

Reproductive toxicity/

No toxic chemical(s) subject to the reporting requirements of Section 313

of Title III and of 40 CFR372 are present. Teratogenicity:

Mutagenicity:

No information

Toxicologically synergistic

None known

Section 13:

DISPOSAL CONSIDERATIONS

Disposal method:

Do not dispose of powder with household waste. Complete dissolution in water

prior to reaching sewage system, flush well with water.

Container disposal:

Rinse with water. Dispose in household waste as per local regulations. Some

containers are of recyclable plastic. Contact local recycling programs for

information.

However, we make no warranty of merchantability or any other warranty, express or implied, with respect to such information, and we assume no liability resulting from use of MSDS information.

MSDS Addendum

Always follow label instructions and warnings. Typical use of product is a guideline only.

Typical Use of Product:	A chlorine free mixture used in solution with water as a stain remover and general cleaner for carpets and hard surfaces, and as a laundry additive. Common dilutions are 1:1 up to 1:120 in water (see package label for applications). Mixing of solution
	should not be done in a closed container due to outgassing of Oxygen which may cause container to burst. Keep away from face when opening mixing containers. Do not mix with household cleaners. As with all cleaners, test solution on an inconspicuous place prior to complete surface cleaning. Rinse surface well after treatment.
