SECTION I - IDENTIFICATION

Proprietary Name: SEAL ACRYLIC
Commercial Name: Aqueous Acrylic Floor Finish/Seal Formulation

DT Proper Shipping Name: Water Base Emulsion
DT Hazard I.D. No:  -   -
DT Hazard Description: Non Hazardous
DT Hazard label Required: Non Required

Date of Issue: 2-1-91
Prepared by: CHAN GANDHI, Ph.D.

SECTION II - INGREDIENT INFORMATION

These materials are subject to the reporting requirements under the Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III, Section 313 and 40 CFR Part 372

SECTION III - PHYSICAL DATA

Burning Point (°F): above 2000°F
Vapor Pressure (mm Hg): Greater than 17 @ 68°F
Solubility in Water: Less than 1
Appearance & Odor: milky white mild acrylic odor

Specific Gravity (Water=1): 1
% Volatile by Volume: 84-85
Evaporation Rate Less than 1
pH: 7.0 - 9.5

SECTION IV - FIRE & EXPLOSION HAZARD DATA

Ash Point (°F): Noncombustible
L (Lower Explosion Limit): NA
L (Upper Explosion Limit): NA
Tinting Media: NA
Special Procedures: none

Fire and Explosion Hazards: Material can splatter above 100°C/212°F. Polymer film can burn

Section V - HEALTH HAZARD DATA

PRIMARY ROUTE OF ENTRY: Skin contact

SIGNS AND SYMPTOMS: Vapor or mist can irritate nose and throat and cause nausea, vomiting, headache, drowsiness, slurred speech, dizziness, stupor, and unconsciousness. Skin contact may be slightly irritating to skin; can be absorbed through intact skin in harmful amounts. Delayed effects are overexposure to solvents by any route may cause liver or kidney damage.

FIRST AID PROCEDURES: If eye contact occurs, flush eyes with water for 15 minutes, see physician if irritation persists. Wash affected skin areas with soap and water. If product is swallowed, dilute by giving 2 glasses of water to drink. See a physician. Never give anything by mouth to an unconscious person. For inhalation move subject to fresh air.

Section VI - REACTIVITY DATA

STABILITY: Stable

CONDITIONS TO AVOID: Temperatures above 177°C/350°F

INCOMPATIBILITY: Oxidizing agent

HAZARDOUS DECOMPOSITION PRODUCTS: When exposed to fire, produces, normal products of combustion.

HAZARDOUS POLYMERIZATION: Will Not Occur

HAZARDOUS POLYMERIZATION-CONDITIONS TO AVOID: None Known

Section VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Floor may be slippery; use care to avoid falling. Dike and contain spill with inert material (e.g., sand, earth). Transfer liquid to containers for recovery or disposal and solid diking material to separate containers for disposal. Remove contaminated clothing promptly and wash affected skin areas with soap and water. Wash clothing before reuse. Keep spills and cleaning runoffs out of municipal sewers and open bodies of water.

WASTE DISPOSAL INFORMATION: Coagulate the emulsion by the stepwise addition of ferric chloride and lime. Remove the clear supernatant liquid and flush to a chemical sewer. Incinerate the solids and the contaminated diking material according to current local, state, and federal regulations.

Section VIII - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION: Wear suitable respirator (MSHA/NIOSH-approved or equivalent) where exposure limits are exceeded.

VENTILATION: Mechanical local exhaust ventilation at point of contaminant release.

PROTECTIVE GLOVES: Impervious

PROTECTIVE GLASSES: Chemical splash goggles (ANSI Z87.1 or approved equivalent)

OTHER PROTECTIVE MEASURES: Use good personal hygiene practices. Where gross eye/skin contact may be a problem, wear/use appropriate protective equipment. Launder contaminated equipment before reuse. In case of spills see Section VII.

Section IX - STORAGE AND HANDLING INFORMATION

Storage Temperature: max 49°C/120°F min. 1°C/34°F Keep from freezing--product may coagulate

Section X - TOXICITY INFORMATION

Toxicity data are available for this product. The effects shown in Section IV are based on information about similar materials and on toxicity profiles for the solvents in this product. Phytene glycol has been shown to produce dose-related teratogenic effects in rats and mice at high concentrations. Dibutyl phthalate has caused adverse reproductive effects in laboratory animals.

Section XI - MISCELLANEOUS INFORMATION

If TO PHYSICIAN: Glycol ethers can cause liver and kidney injury. If swallowed carefully evacuation of the stomach contents is advisable

Information on appropriate emergency procedures phone: INFO-TRAC 1-800-535-5053
