Dear Customer,

Kodak Material Safety Data Sheets (MSDS) are not maintained for discontinued products. Catalog No. 195-4155, T-Max Positive Film Kit, and Ferrotype Plate Polish have been discontinued.

For disposal information, please contact Kodak Environmental Support Services at 716-477-3194.

Thank you for your interest in Kodak products.

Very truly yours,

MSDS Services
Kodak Information Center

EASTMAN KODAK
343 STATE ST
ROCHESTER NY 14650

Dear Sir or Madam,

The Federal Hazard Communication Standard, 29 CFR 1910.1200 and Wisconsin Employees' Right to Know Law state that Material Safety Data Sheets (MSDS) must be supplied to customers at the time of the initial shipment. It is further required that MSDS be readily available to our employees upon request.

In order that we may fulfill this legal obligation, I am requesting that your firm supplies us with the MSDS for **T-MAX POSITIVE FILM KIT (PRODUCT #195 4155) & FERROTYPE PLATE POLISH**. I would appreciate receiving the MSDS within 15 days. Please mail to:

Risk Management Office
UW-Whitewater
Library Room 2008
Whitewater, WI 53190.

If in your opinion your product(s) do not require a MSDS as outlined in the 29 CFR 1910.1200, please advise us in writing within 15 days.

Thank you for your cooperation. We would also appreciate receiving any future updates to the MSDS.

Sincerely yours,

Vay Rodman, Director
Risk Management & Safety
