SPECIAL FIRE FIGHTING PROCEDURES
Firefighters should wear full protective equipment and NIOSH-approved self contained breathing apparatus. Use water fog to cool containers as they may vent, rupture or burst at temperatures greater than 120°F. Use equipment or shielding as necessary to protect personnel from venting, bursting or rupturing containers.

UNUSUAL FIRE AND EXPLOSION HAZARDS
Although non-flammable by conventional Flame Projection Test, accumulated propellant vapors may be extremely flammable. Exposure to temperature over 120°F may cause bursting or venting.
