Welcome to Human Resources & Diversity’s News & Notes March edition. It’s been almost a year since our world shifted and needed to make changes to address a global pandemic. On February 18, 2021, the Perseverance rover became the first artificial object to land on Mars since the Mars lander Insight in 2018. In order for the rover to land during its expected timeframe, it launched July 30, 2020. As you know, this was a time that many people were working remotely in order to help slow the spread of this virus. This includes many of the engineers working on the rover. I reference this expedition because it resonates relevance at this time of the year. Perseverance means, “persistence in doing something despite difficulty or delay in achieving success.” I’m proud to work at UW-Whitewater and to watch the perseverance of our community in making it through some very difficult times. When we continue to work together, we will build a better and stronger university.

**St. Patrick’s Day**

The first St. Patrick’s Day parade took place, in America on March 17, 1601 in a Spanish colony in what is now St. Augustine, Florida. March 17th is the anniversary of St. Patrick’s death in the fifth century. The Irish have observed this day as a religious holiday for over 1,000 years.

Women’s History Month highlights the contributions of women to events in history and society. This celebration began in 1978 as Women’s History Week in California prior to it being recognized as a month in 1987 in the United States, then being recognized internationally. State departments of education then began to encourage celebrations of Women’s History Month as a way to promote equality among the sexes in the classroom.

In March 2011, the Obama administration released a report, *Women in America: Indicators of Social and Economic Well-Being*, showing women’s status in the U.S. in 2011 and how it had changed over time. This report was the first comprehensive federal report on women since the report produced by the Commission on the Status of Women in 1963.

**Did You Know?**

Do you know when and why women’s colleges were started?
The earliest women’s colleges were founded in the mid 19th century to give women access to higher education. This was because it was a time when many people believed that it was unnecessary to educate women and that rigorous study could be unhealthy for women. Wesleyan College in Macon, Georgia was chartered as the first women’s college in 1836. There are still 33 women’s colleges in the United States, two of which are located in Wisconsin and both of those are located in the Milwaukee area; Alverno College and Mt. Mary University.

Employee Performance Evaluation Forms
This is a reminder that UW System and UW Whitewater require all supervisors to conduct annual performance evaluations for all of their employees.

Performance management is an ongoing conversation engaging both the supervisor and employee. An Equity, Diversity, and Inclusion section has been added to our general performance evaluation templates to align with our UWW strategic plan and goals. This effort was done in collaboration with the Office of Equity, Diversity, Inclusion and Support Programs. Here are the links to the EDI webpage and to the performance evaluation forms:
