Programs for teachers. Programs for your students. At the University of Wisconsin-Whitewater, we take education seriously.

In fact, "classrooms across Wisconsin are filled with Warhawk graduates making positive and substantial differences in the lives of thousands of children" said Jeff Angileri of the University of Wisconsin-Whitewater. Read full article here.

We offer master's degrees in education. Master's programs for people who want to switch careers and teach for the first time, say in Business or Special Ed. Dual and concurrent learning programs for teachers who want to teach college courses. Alternative education and special education programs. Programs for early childhood professionals to earn certifications, and so much more. We even offer specialist certificates in autism, applied behavior analysis, or transition (contact Dr. Shannon Stuart for more information).

Pursuing a graduate degree or graduate certificate helps you on your path to higher income, improved connection with your students or coworkers, access to leadership roles, and confidence to be the expert in your field.
Whether you're looking for a 100% online, flexible learning program, a traditional on-campus experience, or anything in between, at UW-Whitewater we have a program for you.

Get started today and take your career to the next level.

New master's degree offers University of Wisconsin-Whitewater students the chance to become the leaders they always knew they were

Photo by Craig Schreiner  | Written by Kristine Zaballos
Students at the University of Wisconsin-Whitewater have the option of a new **Master of Science in Instructional Design and Learning Technology**, beginning in fall 2020.

Based in the university’s **College of Education and Professional Studies**, the new fully online master’s degree will allow professionals to remain in their work roles and learn what is needed to design and develop learning experiences they will be able to deliver in various modes, such as face-to-face, blended and online, in training and education across industries. Graduates will be equipped for positions that often require a master’s degree as a baseline for entry or advancement, including training developer, instructional design specialist, learning experience designer, learning technology consultant, learning and development manager and director of learning technology.

To earn the master’s degree, students will complete their choice of three of four available certificates — Foundations of Learning Design, Producing Effective Learning Experiences, Emerging Technology for Digital Learning, and Leadership in Instructional Design and Learning Technology — and a three-credit capstone experience that will feature career planning, personalized mentorship from a leader in the field, and completion of a portfolio showcasing real-world projects developed in their coursework. Certificates can be earned as stand-alone credentials if a student does not wish to earn the degree. **Read complete article here.**
Student Spotlight:

Elizabeth Walter

Special Education Graduate Program

Written by Faith O’Reilly and Brenna Steed

When asked to describe University of Wisconsin-Whitewater, graduate student, Elizabeth Walter could think of one word, "home." She went on to say, “I have had some of my best memories in life throughout my undergraduate and graduate degree here. There have been ups and downs, but the best part about UW-Whitewater is that there is someone there for you no matter what.” Read complete article here.

Have you heard of Sounds 'N' Visions?

Sponsored by the UW-Whitewater chapter of the National Association for Music Education Collegiate, Sounds 'n' Visions is an opportunity for students to explore and practice various musical concepts. Students will be divided into various age groups and presented with age-appropriate lessons. Students will learn a variety of musical concepts. In addition, students will have the unique opportunity to experience an instrumental petting zoo where they will have hands on experience with brass, woodwind, string and percussion instruments. At the end of their adventure, the students will give a final performance showcasing what they have learned. All grades k-5, entering Fall 2020, are welcome. Registrations accepted until 4/3/20.
Calling all 6th-9th grade girls interested in STEM programs! A one-day, $10 hands-on, customizable experience for students and their adults alike. Tech Savvy | 2020

Saturday, March 14 | 8-3:30

March 31  Math Summit for Educators

April 3 & 4  Early Childhood Conference 2020 for Educators

Camp Highlight: Chatter Matters

Through our partnership with Variety - the Children's Charity of Wisconsin, graduate students in Communication Sciences and Disorders and other student volunteers and instructors host this overnight camp for children with special needs who use assistive communication devices and their immediate family members.

What makes Chatter Matters unique is that it’s just like a traditional summer camp, but the activities are fully adapted for AAC users ages 5 - 15. Through activities like arts & crafts, adaptive sports, games, campfires and music, children learn to improve their communication device use. By allowing parents and siblings to attend, families have fun, create lasting family memories and bond with other families of children with special needs.
This camp is available to children ages 5-15 who use Augmentative and Alternative Communication and their families.

Applications accepted until 3/16/20.

Enrollment is limited to 25 families. Learn More.

MASTER OF SCIENCE IN COMPUTER SCIENCE

“The best part about computer science at UW-W is the faculty. The professors are with you every step of the way. From advising, through classes and personal development, they are engaged and genuinely care about our success.”

Current Computer Science Graduate Student

University of Wisconsin Whitewater | School of Graduate Studies

Get started today and take your career to the next level. UW-Whitewater has a program for you. Whether you're looking for a 100% online, blended, or in-person degree, we offer certificates in autism, applied behavior analysis, or professional studies. We even offer specialist programs for educators and professionals to earn certifications, teach for the first time, or break through. Applications accepted until 3/16/20.

To earn the master's degree, students will complete their choice of three of four available certificates — Foundations of Learning Design, Producing Effective Learning Experiences, and so much more. We even offer specialist programs for early childhood professionals to earn certifications, teach for the first time, say in Business or Special Education.

Student Spotlight: Elizabeth Walter

When asked to describe University of Wisconsin-Whitewater, Elizabeth Walter could think of one word, “Empowering.” She went on to say, “I have had the opportunity to work with hundreds of students from all walks of life through my work at UW-Whitewater, and in each and every one of them I have seen the potential to learn and blossom. I encourage anyone who can to take that opportunity and be part of this community.”

If you have questions regarding admission, we are here to help. Please contact the Admissions Office at admissions@uww.edu.
