Twin Oaks has possibilities for internships, volunteering, and part-time employment. We are currently looking for a part-time overnight staff, which would be a good fit for a college student. The overnight shifts are “sleep-shifts,” staff can sleep at night, but must be available for emergency situations. Staff are welcome to do homework, or other activities, during down times. Jefferson County Veterans Services	Yvonne Duesterhoeft	(920) 674-7240	yvoned@jeffersoncountywi.gov	I'm not certain as to the scope of projects you may be interested in—so I've attached a vision document for the Jefferson County Veterans Foundation which will give you a bird's eye view of some of the issues we are thinking about...

				<p>This 501c3 is a separate entity from the County Veterans Service Office—and was created so that we could fundraise and partner with others to solve issues that prevent Veterans from gaining traction to achieve self-sufficiency. The CVSO (me, at the moment) serves as the 501c3’s director in addition to being a County employee whose role is to assist Veterans and their families navigate the State and Federal VA benefits programs.</p> <p>Right now—I’m particularly interested in alternative housing solutions and am working toward building our first tiny house while we investigate what it would take to establish the first tiny home community in the County. This is a big issue to tackle because of the complicated nature of zoning rules and the politics of alternative housing. Any chance someone would like to do a research project or documentary on communities that have successfully navigated this territory?</p> <p>I have less ambitious project ideas for collaborative projects as well—and am open to suggestions.</p>

The Eagle Nature Trail in Eagle, WI provides seasonal opportunities for students from your program to assist with site restoration and maintenance--clearing brush, invasive species removal, and planting. The trail is an 8-acre outdoor classroom between Eagle Elementary and the public library that includes a native prairie ephemeral pond, and woodland area. Students from grades K-5 make use of the space to study nature in the science, art, and social studies curriculum. We have had a number of college students help over the years in fall, spring, and summer. We'd appreciate hearing from you if this may be of interest to help students in your program fulfill community service.
