

COLLEGE OF EDUCATION AND PROFESSIONAL STUDIES STRATEGIC PLAN 2021

CREATE VISION

We will create a vision that reflects our primary functions of teaching, scholarship and service. Operationalizing our mission, our vision statement will outline where we want to be and will effectively communicate the purpose and value of the college.

COMMUNICATE VALUE

We will effectively communicate our value to campus, regional, and global communities. Our value is in developing students who are prepared to succeed in a complex interdependent world, in our commitment to diversity, and in our commitment to serve our campus, regional, and global communities through mutually beneficial partnerships.

ENGAGE PARTNERS

We will further our engagement with regional and global communities through intentional practice. By identifying untapped possibilities and strengthening current partnerships we will be able to better align our college with campus priorities and prepare our graduates for the future.

INCREASE DIVERSITY

We will create a shared understanding of diversity as it pertains to our teaching, scholarship, and service in supporting students, staff and faculty. The first step in diversifying our organization is to create a shared understanding of what diversity means and how it pertains to our work and student learning.

PREPARE GLOBALLY

We will prepare our students for a changing and complex global reality. The key to ensuring that our graduates are well positioned to live work in a complex global society is to articulate a shared understanding of global learning and then infuse it throughout the organization.
