

*CURRICULUM AND INSTRUCTION
DEGREE PROGRAM (M.S.)*

The Master of Science (M.S.) Degree program in Curriculum and Instruction provides individuals with advanced academic work focused on improving teaching and learning. The degree is designed to blend knowledge of content with knowledge of teaching and learning throughout all course work and within the culminating experience, either an integrative project or a thesis. This degree builds from a common core of knowledge and then allows a degree of specialization in an emphasis of special interest to the individual. Emphases include:

Learning in the Early Years (Birth through the Elementary Grades) - This emphasis is designed to enhance teachers' knowledge and skill in working with learners during the early years.

Library and Information Technology - This emphasis is designed to prepare students to become professional library media specialists who are well rounded in electronic information and technology. It will allow them to complete some of the requirements for the 901, 902, or 903 library media licenses.

Special Issues of Learning Across the Lifespan - This emphasis will allow students to identify a specific issue of learning across the lifespan as a focus for study. For example, students may address issues related to such areas as art education, gifted and talented education, post-secondary education, education for diversity, or education for at-risk students.

Technology Enhanced Education - This emphasis is designed to prepare individuals to function as technology coordinators within individual school buildings or within districts. Preparation for these individuals will emphasize knowledge of a variety of ways to use technology to enhance educational programs.

Health, Physical Education, and Coaching - This emphasis is designed to enhance teachers' knowledge and skill related to health, physical education, and/or coaching.

Learning in the Adolescent Years - This emphasis is designed to enhance teachers' knowledge and skill in working with learners during the adolescent years. The emphasis attempts to blend content and pedagogy within courses, so that those taking this emphasis will enhance their understanding of content, particularly content appropriate for adolescents, and of how students may be helped to learn this content.

The curriculum varies according to the academic emphases. In general, the Curriculum and Instruction program is designed to assist students in applying a deeper understanding of educational issues, trends, and philosophies of education to their classroom. Students will develop skills in identifying and using authentic, valid and reliable techniques of assessment, and develop skills useful in analyzing and solving problems that arise in contemporary educational settings.

Additional Admission Requirements:

Applicants for admission must be licensable by the State of Wisconsin for teaching in public schools. Exceptions may be made by the Program Coordinator for applicants with an adequate knowledge base in education who either (1) have a minimum of two years of teaching experience in a school or (2) are employed outside of school in a position with duties determined by the Coordinator to be instructional in nature. Individuals admitted as exceptions under the latter criterion may be limited to specifically designated emphases.

Degree Requirements:

1. In addition to satisfying all other Graduate School requirements for a degree, students must complete 36 credits of course work including (1) a thesis or (2) an integrative graduate project. Students who choose to write a thesis must complete at least three credits of *Thesis Research*; and those who choose to do an integrative graduate project must complete the *Integrative Project Seminar*.
2. All degree candidates will be required to complete 420/430-723 *Issues and Perspectives in American Education* within the first six credits after being admitted to the program.

3. Students opting to do integrative projects must submit a brief (two-page) proposal describing the project to their advisor and the Program Coordinator for approval before enrolling in the *Integrative Project Seminar* course.

4. Research course requirements for thesis option:

Students electing to write a thesis must take at least one three-credit course or the equivalent in the research methodology they plan to use in conducting their study. The research techniques course may be selected from any department in consultation with the adviser. This course should be counted among the 12 elective credits in the program.

5. At least half of the graduate work in the degree program and at least half of the work in the emphasis must be completed in courses numbered 700 or higher.
