

*SAFETY
DEGREE PROGRAM (M.S.)*

The Master of Science (M.S.) Degree program in Safety Studies provides advanced academic work in occupational safety. Graduate academic work is also provided in traffic and institutional safety.

The curriculum is designed to develop an advanced understanding of general and specific issues relevant to occupational, institutional and/or traffic safety environments. Students will develop skills in collecting, analyzing, drawing conclusions from data and preparing oral and written reports relevant to accident investigations, job safety, health analysis, workers' compensation analysis, fire protection investigation analysis, workplace ergonomics assessment and hazard investigation.
