University Honors Program

# H-Option Packet

**An H-Option Project allows a student to convert credit in a regular course (not a course or section already designated as honors) into Honors credits. The number of Honors credits earned is determined by the number of credits that the course is worth. For example, successful completion of an H-Option Project in a 4-credit course would allow a student to receive 4 Honors credits in that course. The only other requirement for a student to earn the Honors credits in the course would be that they earn at least a B (not a B-) in the course.**
