

UWW Wireless: Connection a NEW Apple iOS Device – iPhone and iPad

Overview

This guide will walk you through the steps to connect your Apple iOS device to the UWW wireless network.

Note: Registering a device on the wireless network using the steps below replaces the need to reset your Net-ID password on your device after a password change.

Step 1:

From the main screen of your Apple iOS device, locate and tap the  (settings) icon.

Step 2:

Tap “Wi-Fi” from the Settings menu.

Select “UWW” from the “Choose a Network” selection menu. When you first connect to “UWW” you will have to enter your Net-ID and password.

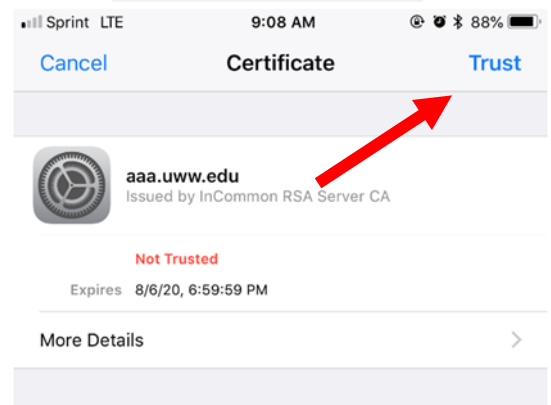

Step 3:

Once you enter your Net-ID and password a certificate will automatically pop up to be installed.

In the upper right hand corner press “Trust”.

Now you are connected to UWW Wi-Fi.
