To the students, faculty, and staff,

Our entire ICIT organization wants to take this opportunity to say **Thank You!** Thank you for your continued work during these unique times, thank you for your willingness to learn new tools and approaches so quickly, and thank you for your unyielding dedication to the mission and goals of our campus.

During these last few months, our entire campus was forced to adapt to alternative methods of teaching, working, and learning. These methods asked many of us to transition and rethink the ways in which we did things, without sacrificing the quality of what we do. It wasn't easy, but you rose to the challenge and as a campus, this adversity brought out the best in all of us.

The mission of ICIT has always been to provide robust technology tools, outstanding technical expertise, and dedicated customer service. We strive to be your technology partner and work to help you succeed in whatever role you play at UW-Whitewater. During the past few months, like all departments, we have transitioned our services and support to meet the needs of a now, mostly remote campus. With the help and feedback from our **outstanding technology partners like YOU**, we were able to create new resources and training sessions as well as to continuously update our technology and services based on your questions and recommendations.

As we move into summer and fall, know that ICIT will continue to work with you to help you succeed as your technology partner. Please visit our REMOTE site (**https://www.uww.edu/icit/remote**) for the latest information on technology resources and services. While the future may be yet unknown, we can take solace in the fact that we can get through anything together. Thank you again for all that you do for this university, and have a safe summer.
