Installing Applications using Software Center (Windows)

OVERVIEW
This guide will walk you through the steps on how to install applications using the "Software Center" self-service program for Windows devices.

Step 1:
Access "Software Center" by clicking on the start menu and typing in the search bar "Software Center." Alternatively, you can click the start menu and scroll through your programs until you find "Software Center." Click on the "Software Center" icon to start the application.

Step 2:
Once in "Software Center", you can now install applications. Make sure you are on the "Applications" menu on the left-hand side. You can now choose the application you wish to install and click "Install."
Once you have installed an application, you can now view it in the "Installation Status" tab on the left-hand side. Please note, this will only show applications that have been installed through "Software Center."
