## Install Cisco AnyConnect VPN Client - Windows

### OVERVIEW

This guide will walk you through the steps to install and launch the Cisco AnyConnect VPN client on your Windows computer.

### Installing the VPN Client

#### Step 1

Open a web browser and go to <https://vpn.uww.edu>

#### Step 2

Log in with your Net-ID and password. Click the **Login** button to continue.

#### Step 3

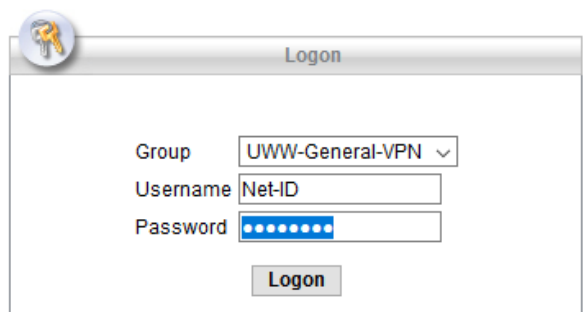

Select Download for Windows from the center of the screen. Double click on the resultant installer.

#### Step 4

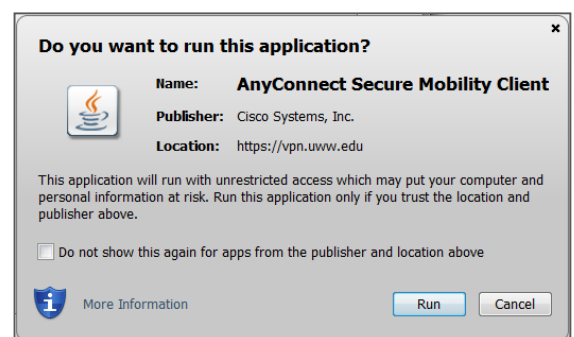

You may be prompted to upgrade your version of the Java Runtime Environment. Please do so now.

You may also be asked if you wish to run the AnyConnect Secure Mobility Client. Click **Run** to continue.

If you receive a warning asking if you wish to allow access to the AnyConnect Secure Mobility Client please click **Allow**.

### Download & Install

## Step 5

If you are prompted to install the Cisco AnyConnect Secure Mobility Client, please follow the steps below.

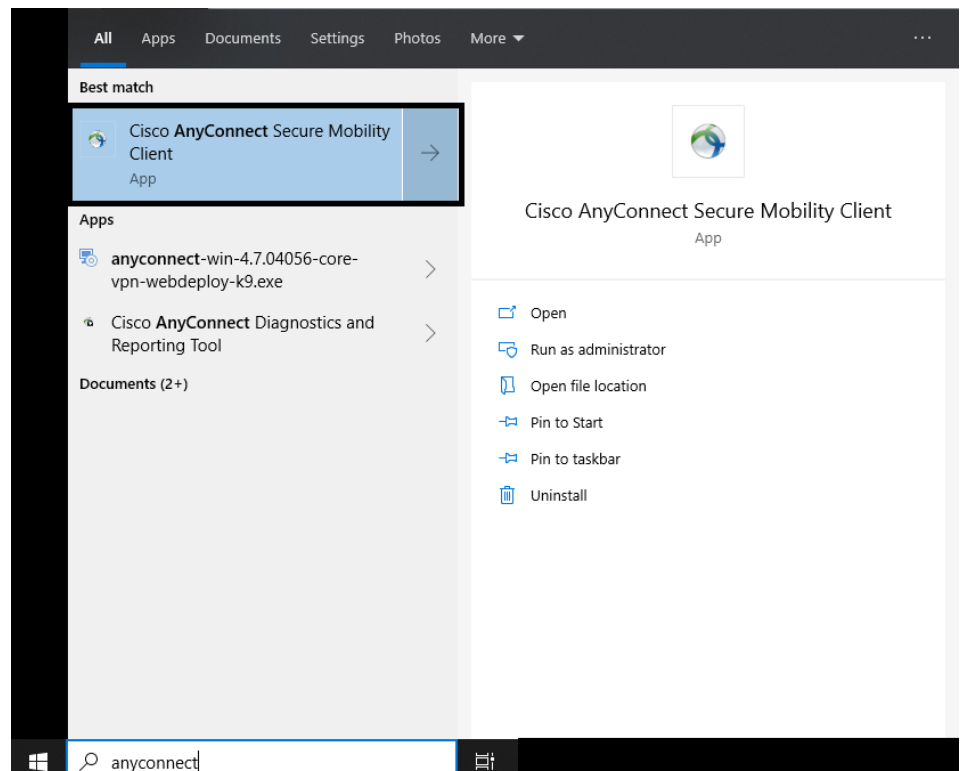

From the installation window, click **Next** and follow the on-screen instructions to install the Cisco AnyConnect VPN client. If you are prompted to accept the software license agreement, click **Agree** or **Accept**.

## Launching the VPN Client

## Step 1

Click **Start**, then search for “AnyConnect”. Select **Cisco AnyConnect Secure Mobility Client**.

## Step 2

If necessary, type [vpn.uww.edu](https://vpn.uww.edu) in the text box available.

Click **Connect** to continue.

## Step 3

Enter your Net-ID and password. Click **OK** to continue.

A pop up box should now appear telling you that you are successfully connect to the VPN.

To disconnect from the VPN, click on the arrow located in the bottom right-hand corner of your screen. Right click on the Cisco VPN client icon and select **VPN Disconnect**.
