ART EDUCATION

MISSION STATEMENT

The mission of the studio art program, which is rooted in the mission of the Department of Art and Design, is to cultivate personal expression and visual literacy, foster independent thought and creativity, develop technical and conceptual problem solving skills, and facilitate professional development and critical and analytical research abilities in a dynamic, collaborative learning community.

STUDENT LEARNING OUTCOMES

Student learning outcomes (SLOs) are statements of what a student will know or be able to do when they have completed a program. They represent the knowledge and skills a program has determined are most important for students to gain from that program. The most useful SLOs are specific and measurable so the program can accurately assess the degree to which students have achieved each outcome, and they align with college and institution mission and values. Data on achievement of SLOs is used to make improvements in the program and increase student success.

Upon graduation, students who major in Art Education at UW-Whitewater will be able to:

- Conceive and create works that demonstrate understanding of the elements and principles of art and design in 2-D, 3-D media and digital environments.

- Develop applied problem solving skills to organize, analyze, interpret and generate visual information and to resolve visual communication problems/projects in more than one specific discipline.

- Create works that demonstrate ideation, initiate visual questions and conceptualize visual solutions.

- Enhance and strengthen the depth of perceptual and observational skills in applied and interpretive methodologies.

- Differentiate between various artmaking methods and make workable connections between concept and media. Experiment with and use varied materials and production methods with safety, sensitivity and to their full potential.
• Demonstrate visual acuity, sensitivity and written/verbal skills applicable to presentation of work, all stages of making and the critical evaluation and review of work by others.

• Demonstrate critical thinking skills and acquisition of discipline specific vocabulary through the analysis and interpretation of creative work within the context of art history and global contemporary art and design practices.

• Understand professional practice in the discipline through exposure to professional artists/designers, art works, and related artifacts and visual resources emerging from diverse and interdisciplinary conceptions of cultural production.

• The ability to think, reflect and manage time and resources as related to the embodied studio art practice.

• Create and sustain a professional community of artist students through shared curriculum, developmental experiences, and values.

In addition, students who major in Art Education will also meet the following education standards from the Interstate New Teacher Assessment and Support Consortium (INTASC):

• [Standard 1: Content Pedagogy] He or she must understand the central concept and structure of discipline and it must be created in such a way that students can learn from it effectively.

• [Standard 2: Student Development] The teacher must be able to understand the student’s ability to grasp things and must come up with the methods that can offer better personality development of the students.

• [Standard 3: Diverse Learners] The teacher must know that the students have different capabilities of learning and based on that must train them.

• [Standard 4: Multiple Instructional Strategies] The teacher must be able to understand and use a variety of instructional strategies so that they are able to solve problems, think critically and show better performance.

• [Standard 5: Management and Motivation] The teacher must be able to understand individuals and create a learning environment to encourage positive social interactions, self-motivation and active learning engagement.

• [Standard 6: Technology and Communication] The teacher should use verbal, non-verbal and media communication to impart knowledge in the students for their better understanding of the subject matter.

• [Standard 7: Planning] It is highly recommended that the teacher must be able to plan various things for students such as curriculum, community and students, and knowledge of subject matter.

• [Standard 8: Assessment] The teacher assesses the students formally or informally to evaluate the social, intellectual and physical development of the students.

• [Standard 9: Reflective Practice: Professional Development] The teacher is considered a reflective practitioner who can evaluate the effects of the choices and actions on others and prepares students to face the world professionally as well.
• **[Standard 10: School and community Involvement]** The last standard of INTASC standards is to develop the relationship amongst students, colleagues, society, parents and various other agencies to support learning and well-being.
